

Distinguished Alumnus Award Honors President of Rush Trustees

DISTINGUISHED ALUMNUS AWARD of the Alumni Association was presented to Frank B. Kelly, Sr. (left) by association president James W. Merricks at the 1969 annual meeting July 15. This was the second year in which the award was made.

40 Alumni Attend New York Annual Meeting

Forty alumni and members of their families attended the 1969 annual luncheon and awards ceremony of the Alumni Association of Rush Medical College. The meeting was held July 15 at the Park-Sheraton Hotel in New York City in conjunction with the annual AMA convention.

The alumni elected James W. Merrick '34, president of the association, Harold I. Meyer '23, vice president, and R. Gordon Brown '39, secretary-treasurer. Drs. Merricks and Brown are serving their third term.

Frank B. Kelly, Sr. '21 was presented with the Distinguished Alumnus Award for 1969. This is the second year in which the award was given. It was presented to Dr. Kelly "for his contributions to American medicine, his loyalty to the Alumni Association, and his efforts toward the reactivation of Rush Medical College."

The activities of the association during 1968-69 were discussed by James Stack, executive secretary. He reported

that alumni dues support had increased in the last year. During the first eight months of the current solicitation, 921 alumni had responded from the total membership of 2,350. This compares with 889 who contributed dues during the entire previous year.

He also reported that 232 alumni were celebrating decade anniversaries including: three for 70 years, seven for 60 years, 24 for 50 years, 113 for 40 years, and 85 for 30 years.

He announced that the Constitution of the Alumni Association had been up-dated for the first time since 1924. Complete text of the Constitution appears elsewhere in this BULLETIN. Work has begun on a new edition of the Alumni Directory.

Mr. Stack presented bronze medalions bearing the seal of Rush Medical College to Alice H. Stewart '34 for her contributions as hostess for the 1969 meeting, to J. Arnold Bargaen '22 as a member of the oldest class repre-

(Continued on page 2)

The highest honor of the Alumni Association of Rush Medical College was presented to Frank B. Kelly, Sr. '21 at the association's annual meeting in New York on July 15.

Dr. Kelly received the 1969 Distinguished Alumnus Award for his outstanding contributions to the field of medicine, his loyalty to the Alumni Association, and his efforts on behalf of the reactivation of Rush Medical College.

Selection of the outstanding alumnus was determined by a nationwide committee under the chairmanship of R. Gordon Brown '39, secretary-treasurer of the association. Presentation of the award plaque was made by president James W. Merricks '34.

In making the award, Dr. Merricks stated:

"It would be impossible to find an alumnus who has been as vitally involved with Rush Medical College over a greater number of years as this year's distinguished alumnus. Dr. Kelly began his association with the College in 1920 as a student and has been active in his support ever since."

Dr. Kelly became a member of the Rush faculty in 1922 and served in that capacity until 1941. He currently is designated a Rush faculty member of the University of Illinois College of Medicine and holds the ranks of emeritus clinical professor of medicine. He has been twice presented with the Raymond B. Allen Instructorship award by senior medical classes of the University for his outstanding services as a teacher.

In 1949, Dr. Kelly was elected to the Board of Trustees of the College. He assumed the presidency of the Board in 1959. During his twenty years as a trustee, much of Dr. Kelly's effort has been directed toward keeping the 132 year old college charter alive and ready to be reactivated at the most opportune time.

Dr. Merricks pointed out, "Dr. Kelly is responsible for the current

THE PROUD KELLY FAMILY attended the ceremonies when Frank B. Kelly '21 (right) was presented the Distinguished Alumnus Award of the Rush Alumni Association. Dr. Kelly's daughter, Mrs. Mary Harrington (left), and wife were on hand. This photo was taken by Noah Barysh '33.

Frank B. Kelly '21 Gets Top Alumni Award

(Continued from page 1)

activity of the alumni association and has mustered financial and moral support from the College trustees. He has also spearheaded the current efforts being made on behalf of reactivation by Presbyterian-St. Luke's Hospital.

"In his own practice of medicine, Dr. Kelly has conducted himself in the Rush tradition of a concerned physician wanting to serve people."

He continues to conduct a private practice in association with his son Frank B. Kelly, Jr. He has served as president of the Institute of Medicine of Chicago and the Chicago Society of Internal Medicine.

In accepting the award, Dr. Kelly said, "I am very pleased and proud that you have considered such activities I have been fortunate to perform were of sufficient importance to merit your selection of me as the Distinguished Alumnus of 1969."

"This is a very precious honor which I value most highly. The beautiful plaque with shield and inscription is a treasure which will keep me continually mindful of your kindness."

The following is an excerpt from a letter of congratulations received by the Alumni Association for Dr. Kelly from Walter W. Sackett, Jr. '38, Representative in the Florida House of Representatives.

"It is a matter of extreme regret that I cannot be with you this year but I would hope that as the representative of the class of '38 you would add to the honors that Dr. Kelly is going to receive the plaudits of our class and the plaudits of myself individually. Just the other day I encountered the notes that I took when I was a stu-

dent under Dr. Kelly, and in browsing through them I found that they were still good sound points in cardiology.

"My greatest hope is that Dr. Kelly will be successful in his reactivation plans for the college and that he would let us alumni participate in some small way such as a creation of a fund, even though most of our donations might be rather modest. God bless Dr. Kelly and our college which has done so much good for the medical care in this country."

Alumni Hold Reunion At New York Meeting

(Continued from page 1)

sented, and to Herman F. Boerner, Jr. '42 and George F. McIntosh '42 as members of the youngest class represented.

Alumni attending the meeting were: Frank B. Kelly, Sr. '21, J. Arnold Bargaen '22, Paul S. Rhoads '25, Milton Steinberg '25, George B. Callahan '26, Ellen Leong '26, Hilger Perry Jenkins '27, Arnold Lieberman '28, Roy E. Brackin '29 and Robert J. Mason '29.

Also S. Elizabeth McPetridge '30, Marcus T. Block '31, Nathaniel E. Reich '32, Noah Barysh '33, Samuel S. Blankstein '34 R. Donald Campbell '34, James W. Merricks '34, Alice Stewart '34, Herman G. Helpert '35, John E. Tysell '35, William L. Ewald '36, Stanley Monroe '36.

And Bernard H. Ailts '37, Bernard Greenberg '37, C. A. Vicens '37, O. Wilhart Koivun '38, R. Gordon Brown '39, John C. Whittier '39 William D. Sicher '40, D. W. Caldwell '41, Sidney B. Gordon '41, Herman F. Boerner, Jr. '42 and George McIntosh '42.

House Staff Awards Recall Rush Traditions

Awards for meritorious service have been presented in the name of Rush Medical College and an outstanding alumnus to young members of the Presbyterian-St. Luke's Hospital house staff.

The outstanding medical and surgical interns were honored at the end of the academic year for their work at the hospital. They represent the future of American Medicine and in many ways reflect the type of training for which Rush Medical College was so well-known.

In 1969, the Rush Medical College awards for meritorious work by interns were presented to Dr. Charles Dru Goodwin and Dr. Neal L. Sklaver.

Dr. Goodwin is a 26 year old native of Montgomery, Alabama. He received a bachelor of science degree from Tulane University in 1964. During his undergraduate days, he received a scholarship from the German Academic Exchange Service and studied for a year in Germany. He was also a member of the honorary societies of pre-medicine and biology.

In 1968, he received his M.D. from Tulane University Medical School. He worked during the summers of 1965 to 1967 as a surgical extern at Jackson Hospital and Clinics. In 1967 and 1968, he served as a pediatric extern at Milne Boys' Home.

Dr. Neal Sklaver is 25 and married. His wife is expecting their first child this fall. Dr. Sklaver was born in New Britain, Connecticut. As a student at the Taft School, a secondary school, he was a member of the Cum Laude Society.

He received a bachelor of arts degree from Williams College in 1964. He was elected to Phi Beta Kappa and received highest honors in political

RUSH MEDICAL COLLEGE AWARDS were presented to Neal Sklaver (left) and Charles Dru Goodwin.

science. Dr. Sklaver received his medical degree from the University of Pennsylvania Medical School in 1968.

The Will F. Lyon award is presented annually to the medical and surgical interns "who best exemplify the high devotion and dedicated service which characterized the career of Dr. Lyon." Dr. Lyon is a member of the Rush class of 1917.

This year, Dr. Thomas J. Zimmerman received the award in medicine. Dr. Zimmerman is 25, married, and a native of Lincoln, Illinois. He received his bachelor of science degree in 1964 from the University of Illinois. In 1968, he earned his M.D. degree from the University's College of Medicine. He is a member of Alpha Omega Alpha, the honor medical society.

Dr. Kenneth A. Lorenz received the Lyon award in surgery. He is 25, married, and the father of one child. Dr. Lorenz has always displayed academic excellence. During his sophomore year at the University of Illinois, he received class honors as a member of the upper quarter of his class. He was graduated from the College of Medicine in 1968 and ranked eighth in his class.

Pardon Our Slips

The last issue of the Rush Alumni BULLETIN contained several errors. We regret any inconvenience or embarrassment they may have caused our alumni.

Alfred A. Strauss '08 participated in the founding of the medical school at the University of Washington in Seattle, not the University of Wisconsin.

It was erroneously reported that Hayes H. Culbertson '14 and Thomas S. Walker '06 were deceased.

WILL LYON AWARDS were presented to Kenneth A. Lorenz (left) and Thomas J. Zimmerman.

University—Hospital Pay Tribute to Louis Sauer '13

Northwestern University and Evanston Hospital paid special tribute to Rush man Louis W. Sauer, '13, developer of whooping cough vaccine, on September 19. The occasion was the first Louis W. Sauer Lecture held at Evanston Hospital.

Dr. Sauer served both institutions for more than 28 years. He currently holds the ranks of associate professor emeritus of pediatrics at Northwestern and pediatrician emeritus at the hospital.

Currently living in Coral Gables, Florida, Dr. Sauer is an honorary member of the Florida and Miami Pediatrics societies and is on the emeritus staff of the University of Miami School of Medicine.

Dr. Sauer attended the first lecture in the series to be held in his honor. At that time, a certificate was presented to him which stated in part:

"Northwestern University pays special tribute to Dr. Sauer who stands as a symbol of the medical greatness a member of the voluntary faculty may obtain. . . . The University expresses appreciation to this man who has brought such signal honor to the University, the Evanston Hospital and himself."

Dr. Sauer developed a petussis vaccine which brought whooping cough under control and later developed the triple antigen (DPT — diphtheria-whooping cough-tetanus antigen).

NOTED PEDIATRICIAN Louis Sauer '13 (right) attended the first lecture in his honor given by Northwestern University and Evanston Hospital. The first speaker was Dr. John L. Sever (left).

Paul Campbell '28 Aims Career at Shooting for the Moon

(EDITOR'S NOTE: Paul A. Campbell '28 is currently serving as chairman of the Space Rescue Committee of the International Academy of Astronautics. At our request, he wrote the following article for the BULLETIN last winter prior to the actual landing of men on the moon. We congratulate Dr. Campbell on his part in this historic feat!)

My energetic wife Eleanor and I recently returned from spending our Christmas Holidays in a small but cozy Motor Inn across the main road from NASA Manned Spacecraft Center on the outskirts of Houston. As almost everyone under age 14 knows, the center is the brain and control for the NASA manned space flights after launch at Cape Kennedy has been achieved. Here we celebrated—while running back and forth to NASA Press Central where I had been accredited as a writer—our thirty-fifth wedding anniversary, my sixty-sixth birthday, Christmas and much more important, an event to which both of us had tuned our lives and energies for the past quarter of a century. The event was three men around the Moon and return without a hitch. Thousands of people, industries and universities had a part in this marvelous accomplishment. My part had been a small one but lots of fun.

My small part had begun at the end of World War II when I had been given a reprieve from my job as Director of Aeromedical Research at the Air Corps School of Aviation Medicine at Randolph Field to join an Air Staff team to go into Germany as soon as hostilities had ceased. Our mission was to interview the German scientists and bring back anything new which might help to bring to an end the Japanese portion of the conflict. Germany, as many of you will remember, was in chaos; however, many of their diligent, methodical scientists continued to work, almost as though there had been no war. Most of them were communicative—some about the feasibility of using the German V-2 Rocket for space research. A few were talking about staging the rocket for manned space flight.

On my post-war return to Chicago, Rush and my teaching appointment in the department of otolaryngology had fallen prey to shifting sands. My staff appointment at Presbyterian was intact but aviation was still gnawing at my corpuscles and this little matter of going into space and possibly to the

SPACE MEDICINE has been the concern of Paul A. Campbell '28. Currently chairman of Space Rescue Studies Committee of the International Academy of Astronautics, he attended the launching of Apollo IX.

Moon contaminated everything. My allegiance in the meantime had been absorbed by the University of Illinois.

In early 1950 Major General Harry G. Armstrong, my old boss, and Dr. A. C. Ivy, my new boss, thought it would be interesting and fun to bring together a little symposium and discuss the problems of man in space. On March 3, 1950—in retrospect, an historical event—the symposium was held at the University of Illinois College of Medicine. Much to our surprise, the house was packed with some sitting in the aisles. Dr. Ivy made the introduction; General Armstrong talked about a new department of space medicine at the School of Aviation Medicine which he commanded at the time; Wernher von Braun explained rockets, staging, satellites and space stations; Dr. Hubert Strughold lectured on physiological considerations of man in space and extra-terrestrial life; Dr. Heinz Haber covered astronomy and space medicine; Dr. Konrad Buettner took the subject of space bioclimatology. My dissertation was on the subject of man in the weightless state.* That evening did it. My re-association with Gen. Armstrong, Wernher von Braun, Drs. Strughold, Heinz Haber and Konrad Buettner was too much. Soon I was back at the School of Aviation

Medicine in my former job of Director of Research. Now I was a “regular” and I had a department of Space Medicine in my research fold. My new boss was Brig. General Otis O. Benson Jr., my Rush classmate and old friend and incidentally, a former member of the Presbyterian staff. Things were moving. The word “space” in some circles was still a naughty word—a four letter one at that. But then we could always switch to “extra-terrestrial” if going got too rough or we were accused of operating a science fiction department.

From 1953 to 1956 I was assigned to the American Embassy in London to observe European research in aerospace medicine. My hobby-shop at the time was the British Interplanetary Society and other European Space Organizations who had the desire to do something about space flight but no support and no facilities. They just talked but many of our best ideas came from these sources. The most important aspect of their activities was their enthusiasm which was contagious.

In August, 1955, an International Astronautical Congress was held in Copenhagen. It was an historical occasion. During the course of the meeting, two bomb shells were thrown in and exploded with a bang. First, President Dwight Eisenhower gave our delegation permission to announce our space program. A few hours later the Soviet delegation announced theirs.

Space programs were really moving and with much needed support. According to a number of scientists and

*That night our good friend, former associate and aerospace enthusiast Dr. John Marbarger gathered our papers, edited them and developed them into the beautiful little book called “Space Medicine.” It was the first of its kind.

SOVIET COSMONAUT Pavel Popovich (left) and Dr. Campbell at 1967 Belgrade Meeting.

IN-FLIGHT RESEARCH was one of the tasks of Dr. Campbell during World War II. He is seen above at Randolph Field in Texas during 1940.

lots of science fiction people, there were lots of bogey men lurking in space awaiting to inflict dire punishment on those who trespassed the top of the atmosphere. These had to be slain, dispelled, circumvented, protected against or whatever you do with barriers. Weightlessness, meteorites, cosmic radiation, high acceleration rates, explosive decompression, extremely high and extremely low temperatures and the psychological effect of isolation and many others were among them. They all had to be dealt with or ignored or in some way taken care of. They were, and Man has been around the Moon.

Aviation medicine whose scientific paternity was often questioned had in spite of the allegations afforded much background material with which aviation could be extended into space. Several Rush and Presbyterian people and their University of Illinois and University of Chicago colleagues left indelible imprints during their service association. Otis O. Benson Jr. had instigated and directed a number of programs and among a number of accomplishments had had more than his share in the development of both the Aeromedical Laboratory at Wright-Patterson Air Force Base, Ohio, and the Aerospace Medical Center at Brooks Air Force Base, Texas, both of which he commanded at one time or another. George Hass, John Marbarger, Bruce Taylor, Bob Rushmer and Bud Grulee all made very definite contributions. Dr. Melbourne W. Boynton who many of us knew at the University of Chicago Clinics lost his life during an experimental, very high altitude, parachute jump.**

All of us in aviation medicine had learned quite a lot. For one thing, we had learned never to bet against the

ability and capability of homo sapiens. We had learned that a fairly healthy, well selected, well trained man is a much more adaptable creature than most realize, and can perform in unusual environments much better than most suspect. Probably even more important we learned that when he was called upon to do something beyond his innate capability we could call upon our friends, the engineering scientists, and they could design and build an environment for him in which he could do almost anything. Thus the space capsule, deep sea rigs, etc.

As I returned from Europe and was serving assignments at the Air Force Office of Scientific Research in Washington and then returning to head space medicine at the Brooks Aerospace Medical complex, space medicine was developing rapidly with the help of thousands of people in the various services, universities and industries. They were all working together to get many headed into space exploration without waiting for evolution to sprout wings, gills, airless lungs, steel shells or what have you.

Soviet cosmonaut Uri Gagarin's orbital flight—the first—October 4, 1957 hurt like salt in a wound because many of us felt USA could have been first had the various programs had sufficient support.

The programs from that point on are well-known to all. Mercury, Gemini and Apollo on our side and the Vostoks, Voskhods and Soyuz on the other side. The National Aeronautics and Space Administration (NASA)

has had both the mission and the authority for some time and, with the help of an organized space effort involving most of the nation, are doing a splendid job. The orbital pathway around mother earth is beginning to take on some of the characteristics of a junkyard with more than a thousand pieces of space junk, rocket casings and assorted parts spinning above the earth at 17,500 miles per hour. Hundreds of satellites are up doing their jobs of weather observation, navigational aid, studies of earth resources, mapping, communications, etc.

The year 1963 caught me at age 60, the time of mandatory retirement from the Air Force. At the time I was the Commander of the USAF School of Aerospace Medicine involved in the research and teaching I loved. Like many at that age, my adrenalin was not dripping but pouring. Fortunately I have been able to keep many of my "space" connections and keep busy with consultations, writing, lecturing and traveling—mostly to International Astronautical meetings. Travelitis had gotten into my blood and in this jet-age it is serious—especially for one who loves to fly. My book "Earthman-Spaceman-Universal Man" kept me pinned to a typewriter or incarcerated in libraries for the most of two years. Lecturing on my favorite subject "Man in Space" has carried me over a huge hunk of the world. Chairmanship of the Space Rescue Studies Committee of the International Academy of Astronautics keeps me in contact with the space people I admire and who I like to be with. Santa Claus was good to me this year. I hope he is still better next year with an accomplished mission of man on the Moon with safe return.

That is my Christmas story!

**An honor which I received in 1968 and of which I am very proud is the Melbourne W. Boynton Space Flight Safety Award presented by the American Astronautical Society in his memory.

Classnotes '96-'09

HILL, TOLBERT F., '96 (Athens, Illinois) is retired but still active and in fairly good health. He was a guest speaker at the University of Chicago medical alumni banquet last June. He proudly reports that there are 15 doctors in his family, including his father, four brothers who all graduated from Rush, his son, grandson, nephew and great nephew.

SCHILLER, JULIUS, '99 (Schenectady, New York) is now 95 years old and has been retired from active practice seven years. In 1960, he was elected "Practitioner of the Year" by the Montgomery and Fulton County Medical Society. He served as president and secretary of the society for many years. As a young man, he served as a lieutenant in the New York National Guard for six years, health officer of Amsterdam (New York) for 12 years, and public school medical inspector for eight years. He was made an honorary staff member of Amsterdam Memorial Hospital last spring. His hobbies include music, photography, and gun collecting. He is an accomplished classical pianist.

STEVENS, BRAMWELL F., '99 (El Paso, Texas) at 96 writes that one of his four grandsons is studying pre-med and that he hopes that he will be able to attend Rush someday in the near future. He recalls that he arrived in El Paso in 1901 when the town had 17,000 residents. He has watched it grow to 350,000. He introduced to the area the use of ether by the drop method developed by Rush graduate Lawrence H. Prince '92. He has also served as president of the El Paso County Medical Society and chief of staff of two local hospitals.

Dr. Stevens also asks "How many of the class of 1899 are still alive?" According to our records, there are eight. MORCOM, HARRY W., '00 (Virginia, Minnesota) has been living in a convalescent hospital for the past 12 years. Even with the many illnesses he has had over the years, he reports that he feels wonderful. "Guess I am a tough old Rush graduate."

MORRELL, JOSEPH R., '04 (Ogden, Utah) is now 89. In 1945, a hip joint disease required him to retire. He resumed limited practice in 1956 as chief of medical service at the U. S. Army Defense Depot in Ogden. In 1967, he retired permanently, but is still reasonably active.

STACY, LEDA JUNE, '05 (Hightstown, New Jersey) served her internship at Children's Hospital in San Francisco and was in general practice for one year in Rochester when she was asked to join the staff of the Mayo Clinic in 1907 as an anesthetist. Later, she was appointed head of the department of gynecology where she served until moving to New York in 1935. She was a consultant in gynecology at White Plains hospital until her retirement in 1967.

WALKER, THOMAS S., '06 (Riceville, Iowa) sends his regards to the Class of 1906.

HALL, DAVID C., '07 (Tucson, Arizona) is 94 and lives with his son, Dr. Donald Hall. From November to May he resides in Green Valley, Tucson. His wife passed away in 1964.

FORNEY, SAMUEL W., '08 (Boise, Idaho) proudly lists four generations of Rush graduates beginning with his grandfather, E. A. WILCOX, 1857, his two sons, two grandsons (including Dr. Forney) and Dr. Forney's two sons.

BOURKE, HENRY P., '09 (Oceanside, California) was active in the Association of Retired Doctors of Medicine of Broward County, Florida prior to moving to California. Membership is constantly growing because of Florida's attraction to retiring M.D.'s. The monthly meetings include lectures by prominent individuals in the fields of medicine, law, and science. NORTON EVERSOL '21 is president and WILLIAM BLANK '38 is vice president of the organization.

FLANSBURG, HARRY E., '09 (Lincoln, Nebraska) has practiced internal medicine in Lincoln since completing his internship at Cook County Hospital. He retired in December, 1967. He has kept in touch with classmates EVERETT L. GOAR and ALBERT T. CHARLTON.

Hospital Honors Rushmen for Years of Service

Thirteen Rush alumni were honored by Presbyterian-St. Luke's Hospital (Chicago) for years of service as members of the attending staff.

Certificates of appreciation were presented to the alumni at the hospital's annual Trustee-Staff dinner on April 22. The Rush men received congratulations from Albert B. Dick, III, chairman of the hospital's Board of Trustees, and James A. Campbell, M.D., hospital president.

Walter H. Theobald '11 was hon-

ored for 55 years and Edwin F. Hirsch '15 for 50 years of service to the hospital staff. Forty-five year awards were presented to Edward Allen '20, James A. Gough '22, William G. Hibbs '20, and Eugene F. Traut '20.

Receiving 40 year recognition were Edward C. Holmblad '19 and William F. Moncreiff '17. Thirty-five year staffers included R. Kennedy Gilchrist '31 and Frank V. Theis '24. Honored for 30 years were: Hugo C. Baum '36, Cecil C. Draa '32, and Arthur H. Klawans '28.

Classnotes

Any alumnus wishing to contribute to Classnotes may send his contribution to James Stack, Executive Secretary, Rush Alumni Association, 1758 West Harrison Street, Chicago, 60612. Pictures are welcomed. They will be returned if marked clearly with name and address on the back.

The items in this section are listed alphabetically according to graduating class. All class years have been verified with records of Rush Medical College. Designations of classes 1917 through 1937 are based on the year in which the medical degree was conferred rather than the year in which the four year certificate was awarded.

HOSPITAL CONGRATULATIONS were extended by Albert B. Dick III (left), Chairman of the board, and James A. Campbell, M.D., president of Presbyterian-St. Luke's Hospital, to (from left) R. Kennedy Gilchrist '31, William G. Hibbs '20, Walter H. Theobald '11, Eugene F. Traut '20, Frank V. Theis '24, Edward C. Holmblad '19, and Edwin F. Hirsch '15.

Classnotes

'10-'19

MASON, CURTIS E., '11 (Beaverton, Oregon) practiced in Oregon from 1912 until he retired in 1965.

VAN NUYS, ROSCOE G., '11 (Walnut Creek, California) is the author of a recent book "Yesterday, Today and Tomorrow Give of Yourself" which is described as a "book which not only looks back, with a wealth of richly descriptive anecdotes, on what has passed, but looks forward, with dynamic constructivism, toward the future, in the realm of progressive thought." At the age of 87, he recently returned from the hospital where "a brave young surgeon removed four stones from the common bile duct and took out the gall bladder." His son is following in his footsteps as a radiologist in Walnut Creek, and his daughter is married to a colonel in the air force stationed at Andrew's Field. He is hoping to hear of the reactivation of Rush into its old status. GOETSCH, ARTHUR, '12 (Fort Lee, New Jersey) has been living in Fort Lee since 1956. He was awarded the gold medal "for distinguished service" by the Long Island College Hospital in 1964. He had served that hospital as a surgeon from 1919 to 1954.

HEUMAN, J. M. F., '12 (Omaha, Nebraska) at the age of 90, is still practicing a little medicine (geriatrics) as well as hunting and fishing.

SMITH, WILLIAM B., '12 (Delano, California) has four children, 13 grandchildren, and eight great-grandchildren. He is semi-retired with his office in his home. Known locally as "Limerick Bill, M.D.," we featured some of his rhymes in a past issue of the BULLETIN. Dr. Smith has served as mayor of Delano and boasts being a Silver Beaver Boy Scout.

STEIN, IRVING F., '12 (Glencoe, Illinois) is semi-retired and serves as vice president of the Pan-Pacific Surgical Society and the International Fertility Association.

NUZUM, FRANK R., '13 (Santa Barbara, California) writes "I am probably unique amongst my remaining fellow classmates in supporting a pacemaker which is remarkably helpful."

BARNES, MILFORD E., '14 (Iowa City, Iowa) is professor emeritus in the department of preventive medicine and environmental health at the University of Iowa College of Medicine.

JONES, RICHARD N., '14 (St. Cloud, Minnesota) has recently re-

tired after 54 years of practice. Nine of those years were as a "country doctor." At 84, he is in good health. His daughter lives in Long Beach, California and his son is on the dental staff of Veteran Hospital in Los Angeles. He reports that EARL CRAFTS, '14 (Lima, Ohio) has also retired.

BERKEN, FREDERICK N., '15 (Aberdeen, Washington) celebrated his 50th wedding anniversary in 1968. Although 80 years old, he is still practicing medicine.

BOLIBAUGH, ORAL B., '15 (Hollywood, California) is still in the practice of orthopedic surgery. In April, he celebrated his 79th birthday.

CARTER, HOMER M., '15 (Madison, Wisconsin) retired in 1965 after 50 years of active practice in obstetrics and pediatrics. A Founding Fellow and Life Member of the American College of Obstetricians and Gynecologists, he is well, still very active and plays a little golf.

EMGE, LUDWIG A., '15 (San Francisco, California) retired from an active gynecology practice on December 31, 1968.

KNEESHAW, ROBERT S., '15 (San Jose, California) reports he is having a wonderful time golfing, duck and pheasant hunting, boating and fishing. He has enjoyed seeing many old Rush friends at conventions including JOSEPH L. MARTINEAU '13 (St. Paul, Minnesota), CYRIL J. GLASPEL, '15 (Grafton, North Dakota) and JOHN R. GREEN, '11 (Independence, Missouri).

LANGHORST, ARTHUR L., '15 (Dallas, Texas) writes "I believe it would be wonderful if a Rush Medical College could again come into existence."

UNGER, LEON, '15 (Chicago, Illinois) is president of the Illinois Foundation for Asthma. Last November, he was cited by the City of Hope for "leadership in the field of allergy."

BALDWIN, ARTHUR K., '16 (Carrollton, Illinois) retired last November.

CAMERON, ANGUS L., '16 (Minot, North Dakota) traveled quite a bit in 1968. He and his wife visited OWEN KING (Clearwater, Florida), WILLIAM A. TAYLOR (Portage, Wisconsin), RAY THOMPSON (Grafton, North Dakota) and PAUL ROWE (Minot, North Dakota), all of the class of '16.

GIFFORD, MARTHA JANE, '16 (Fairport, New York) lives at the Fairport Baptist Home.

HIRSCH, EDWIN W., '16 (Chicago, Illinois), at the age of 80, is doing a great job as editor of the proceedings of the Institute of Medicine of Chicago.

COURT R. STANLEY, '11 (Minneapolis, Minnesota) reports that at 88 years old he is in fairly good health. He retired in 1965 and spends much of his time working around the house. After his graduation, Dr. Stanley was appointed instructor in medicine at the Philippines Medical School in Manila. He served with the John B. Murphy unit during the First World War. Upon returning from the service, he returned to Minneapolis and private practice. He helped found the Worthington clinic and remained a partner until 1955.

KULVIN, MAX M., '16 (Miami, Florida) retired in 1958 from service with the Veterans Administration Hospitals. He served at Hines, Illinois, and Coral Gables, Florida, as chief of EENT. He worked at a private practice in ophthalmology until 1966. His son, Stephen, is following in his footsteps as an ophthalmology resident at Bascom Palmer Eye Institute in Miami. A married daughter lives in Oakland, California. Dr. Kulvin has four grandchildren.

THEIGE, KARL J., '16 (Viroqua, Wisconsin) has retired from medicine and is 86 years old.

TOMPKINS, CHARLES P., '16 (Grafton, North Dakota) has retired from surgery and is 80 years old. His son, William, is a general surgeon in Fort Lauderdale, Florida, and completed his internship and residency at Cook County Hospital. Dr. Tompkins is proud of his 17 year old grandson who is listed nationally as a tennis player. He is also looking forward to a future in medicine.

BUTLER, WILLIAM J., '17 (Tucson, Arizona) reports that all is well with him after a few "happenings" in his seventies.

CHRISTOFFERSEN, OLAF H., '17 (Seattle, Washington) is retired, in good health and having a wonderful time.

GRICHTER, BENJAMIN B., '17 (Glen Ellyn, Illinois) retired from practice in 1963 and moved to Albu-

(Continued on page 8)

(Continued from page 7)

querque, New Mexico. However, he has moved back to Illinois because the lower altitude is better for his health. HEISE, HERMAN A., '17 (Milwaukee, Wisconsin) writes "Since I am all too frequently bothered by my incredulous friends who ask 'Are you still flying your plane?' I have finally found the answer which puts a stop to further questioning . . . 'Old pilots never die . . . they join a nudist colony when they can't take off any more'."

KEPNER, RAYMOND B., '17 (Carmel, Indiana) celebrated his 51st wedding anniversary on September 3. He is waiting for the next edition of the Rush Alumni Directory in order to keep track of his classmates.

ORTMAYER, MARIE, '17 (Carmel, California) was lecturer in the department of medicine, University of Colorado Medical School, from 1956-63 at which time she retired. Last June, she was presented a past-president's gavel from the Gastroenterology Society at the University of Chicago Alumni luncheon in San Francisco.

FINNERUD, CLARK W., '18 (Chicago, Illinois) has retired from his practice of dermatology.

HUBER, HARRY L., '18 (Laguna Hills, California and Naperville, Illinois) lives at the Laguna Hills Leisure World during the winter months. In the summer he returns to his consultation practice in allergic diseases in Naperville, Illinois.

KERRIGAN, ROBERT LEE, '18 (Michigan City, Indiana) attended his 50th Rush reunion last June. "Saw many good friends . . . all present still active . . . it was a most happy occasion."

OPPENHEIMER, LEON I., '18 (Oakland, California) attended the 50th class reunion in San Francisco last year but unfortunately had to miss many of the meetings due to a left hip and right eye disability. He did get to see FRANKLIN P. SCHUSTER '18 and meet his family. He was most pleased to receive the 50th testimonial and his 50 year pin.

BUTLER, CRAIG D., '19 (Oak Park, Illinois) has a private pediatric practice in Oak Park and is on the staff of West Suburban Hospital. Following in his footsteps is his son who is a pediatrician and his grandson who is in his second year of medical school at Western Reserve University.

LOMMEN, PETER A., '19 (Austin, Minnesota) built a clinic for himself and his two sons in 1960. "I have

(Continued on page 9)

YEARS OF DEVOTION and service to the medical needs of DeKalb, Illinois, by Clifford Smith '10 (center) were recognized last year. A plaque was presented to him by W. Dee Palmer, president of the Glidden Hospital Board of Trustees (right), and Lawrence Pugh, hospital administrator.

DeKalb, Illinois Recognizes Clifford Smith '10

The community of DeKalb, Illinois has honored Clifford E. Smith '10 for giving more than a half-century of service to the city. Dr. Smith received a plaque in recognition of his service from the president of the DeKalb Public Hospital Board of Trustees.

At 84, Dr. Smith is the only living member of the founding staff of DeKalb Public Hospital which opened in

1928. He served as the hospital's first chief of staff and was instrumental in obtaining the hospital's first accreditation.

Dr. Smith moved to DeKalb in 1911 following his graduation from Rush Medical College. He served three terms as chief of staff and 15 years as secretary of the hospital. He specializes in eye, ear, nose, and throat.

SMITH BUILDING was opened in DeKalb in 1948. Dr. Smith's offices were housed in the building for many years. Now his sons, Clifford and Robb, occupy the medical offices.

(Continued from page 8)

secretly sold out to my sons but am still practicing medicine at the age of 75."

MAC KENZIE, PIERCE, '19 (Evansville, Indiana) is still active in obstetrics and gynecology. His interests include gun collecting, shooting, fishing, and photography. He is a retired Navy captain.

MILLS, GEORGE W., '19 (Wall, South Dakota) is serving his 12th term in the State legislature and is writing a book entitled "Fifty Years of Patients by a Family Doctor."

PETERS, ALBERT G., '19 (Chicago, Illinois) is still active in the EENT practice. He is on the staff of St. George Hospital.

SAUER, HENRY C., '19 (Fairbury, Illinois) has retired and spends his winters in Mesa, Arizona. He was the originator of the Fairbury-Forrest Clinic and last June was honored at an open house in Fairbury for 50 years of practice.

Blair Holcomb '20 Writes Books to Aid Diabetics

"How to Live with Diabetes" is the title of a book written by Blair Holcomb '20. Dr. Holcomb has been working with diabetic patients since 1923.

A native of Portland, Oregon, Dr. Holcomb studied at the University of Oregon Medical School and received his medical degree from Rush Medical College in 1920. He returned to Portland after completing his internship at Cook County Hospital, Chicago.

In 1923, he established a series of classes for his diabetic patients serving as teacher, dietitian, and physician. Later he became head of the diabetes outpatient clinic at the University of Oregon Medical School. He held that post until 1953 and is currently clinical professor of medicine emeritus at the school.

Dr. Holcomb has written many articles on diabetes which are designed to help the patient. He began publication of the Diabetes Bulletin in 1928 to keep his patients better informed about the changing concepts of treatment. He continues to edit the Bulletin after 45 years.

In 1941, Dr. Holcomb was co-author of a book entitled "A Diabetes Notebook." He has also served as president of the American Diabetes Association, the Oregon State Medical Society, the Multnomah County Medical Society, and the Portland Rotary Club. Dr. Holcomb retired from active practice in 1965.

80th BIRTHDAY CONGRATULATIONS were extended to Morris Fishbein '12 (second from right) by Robert H. Finch, Secretary of Health, Education and Welfare (left to right), Dr. Michael DeBakey, Houston heart surgeon, and Dr. Christian Barnard, South African heart surgeon who performed the world's first heart transplant. (Chicago Daily News Photo)

Elite Gather for 80th Fishbein Birthday

More than 500 physicians, political leaders, and socialites attended the 80th birthday celebration of Morris Fishbein '12 on July 22 in Chicago.

The benefit dinner was held to support the University of Chicago's Morris Fishbein Center for the Study of the History of Science and Medicine.

Main speaker at the affair was Robert H. Finch, Secretary for Health, Education, and Welfare. In addition the dinner was attended by heart-transplant surgeon Dr. Christiaan Barnard of South Africa, Dr. Nanna Svartz of the King Gustav Research Institute in Stockholm, Mayor Richard J. Daley of Chicago, heart surgeon Dr. Michael DeBakey of Houston, and John Card-

inal Cody of Chicago.

Most of the evening's conversation and formal speeches were given over to Dr. Fishbein, who was described as a "noted writer, editor, world traveler, art collector, theatre and opera patron, and avid baseball fan."

Dr. Fishbein served as editor of the Journal of the American Medical Association for 37 years. He is now editor of Medical World News and has just completed his 32nd book, an autobiography entitled "Morris Fishbein, M.D."

In speaking of Dr. Fishbein's career, Dr. Barnard said, "When I look at his achievements I develop an inferiority complex."

RETURN TO RUSH—Elbert E. Munger '25 of Spencer, Iowa, toured the Rush Medical Library last fall where he met fellow Iowan Mary Winnecki, librarian. Dr. Munger was attending a postgraduate course in general practice at the Cook County Graduate School. He had been out of practice for about four years and wanted to catch up on what he had missed. The man in the middle is Dr. Daniel Brainard, founder of Rush Medical College.

Classnotes

'20-'29

ALLEN, EDWARD D., '20 (Walnut Creek, California) is enjoying his retirement and keeping busy with charity work.

ELDRIDGE, CHARLES J., '20 (Kansas City, Missouri) has practiced pediatrics for 47 years in Kansas City. He is looking forward to celebrating his 50th anniversary in medicine.

HYSLOP, ROBERT J., '20 (Freeport, Illinois) writes that he hopes Rush can be reactivated and has offered his help.

MEYN, ARTHUR W., '20 (Chicago, Illinois) is serving as assistant city physician in Chicago.

VAN DER VELDE, OTTO, '20 (Holland, Michigan) is semi-retired and is practicing industrial medicine.

WALDO, PROCTOR C., '20 (Oak Park, Illinois) retired in 1961 but still practices during the summer months at a resort in northern Wisconsin. His daughter is married to a Northwestern medical graduate and his son owns and operates four shelter care homes.

WALTERS, WALTMAN, '20 (Rochester, Minnesota) retired from the surgical staff of Mayo Clinic after 40 years in 1960. He had served as professor of surgery at the Mayo Graduate School of Medicine of the University of Minnesota. He continues to edit the 12 volume Lewis Practice of Surgery and attend surgical meetings in the USA and abroad. He likes to golf and spent some time this spring at the Skyline Country Club in Tucson, Arizona. He also attended the American Surgical meeting in Cincinnati in April. The meeting hall in St. Mary's Hospital is named for him.

DRAGSTEDT, LESTER R., '21 (Gainesville, Florida) and his wife had quite a trip last October. While on a lecture tour, they traveled to Honolulu, Tokyo, Hong Kong, Manila and Bangkok. He met a number of former Rush students during the tour. He reports "I'm still kicking but not raising much dust." He attended the joint meeting of the Society of University Surgeons and the British Surgical Research Society in London, England in July.

HIBBERT, GEORGE F., '21 (Skokie, Illinois) has had an active obstetrics and gynecology practice for 45 years and is on the staff of Lutheran General Hospital, Park Ridge.

MUSLOW, FREDERIC W., '21 (Cedar Rapids, Iowa) writes that he enjoys the Alumni News Bulletin and glad to see the interest shown in the revival of Rush.

MURRAY, EVERETT E., '21 (Downers Grove, Illinois) spent much of his career as a Presbyterian missionary. He was in China from 1923 to 1951 and North India between 1952 and 1957. He wonders if anyone has the address of Daniel B. Malan of South Africa.

PALMER, CLINTON F., '21 (Albert Lea, Minnesota) is well and in active practice. He was associated with his father, W. L. PALMER, '96 for 30 of his 50 year practice.

VEIRS, WILLARD L., '21 (Urbana, Illinois) is in general practice and "still taking care of sick folks." His son, John, is a graduate of the University of Illinois College of Medicine and is doing general work and surgery.

BRANDES, LEO, '22 (Los Angeles, California) is still in full time general practice. His wife, Elaine, is a governor of District II Society of California Accountants. Daughter Nancy is working toward her masters in speech therapy.

LASH, ABRAHAM F., '22 (Chicago, Illinois) is professor emeritus of obstetrics and gynecology at Northwestern University, but continues to teach.

LEDERER, FRANCIS L., '22 (Chicago, Illinois) is president of the American Otological Society. He is also co-author of the "Atlas of Otorhinolaryngology and Bronchoesophagology" which will appear in six languages.

ROSENE, GORDON L., '22 (Chicago, Illinois) retired in 1967 from his practice of obstetrics and gynecology. He receives yearly visits from FREDERICK Mulsow '21 who lives in Cedar Rapids, Iowa. His son, Gordon, Jr., is teaching at Ball State University in Muncie, Indiana. He received a Ph.D. in Anatomy at the University of Illinois.

BURDICK, ALLISON L., SR., '22 (Chicago, Illinois) sends his congratulations on the Rush Bulletin and adds that a number of former Rush men have spoken of their hopes for early reactivation of Rush. He is presently serving as vice president of the Illinois chapter of the American Academy of General Practice, and last September served as chairman of the subcommittee on scientific exhibits for the academy's annual convention in Las Vegas.

CAYLOR, HAROLD D., '22 (Bluffton, Indiana) attended his 50th reunion last June at the University of Chicago. He still has an active surgery practice at the Caylor-Wekel Clinic.

COLWELL, ARTHUR R., '22 (Chicago, Illinois) was the recipient of the 1968 Edwin S. Hamilton Teaching Award which was presented by the

Interstate P.G. Medical Association. His two sons, Arthur R., Jr. and John A., are both board certified internists and are on the faculty of Northwestern University Medical School.

RAINEY, CLARENCE W., '23 (Sarasota, Florida) is now retired. He was on the staff of the University of Chicago eye clinics for 12 years. He retired after four years in the U. S. Navy and 20 years service in the V. A. Hospital in Downey. His son is an associate professor of law at Michigan State University, one daughter is working for her Ph.D. in education at Michigan State and the other daughter is a housewife residing in Lake Forest, Illinois.

CORR, W. PHILIP, '24 (Riverside, California) has served as a governor of the American College of Physicians in Southern California since 1964.

ELSTON, RALPH W., '24 (Ft. Wayne, Indiana) retired from an active surgery practice last June after 40 years. He still acts as consultant for the Medical Malpractice Insurance Company and is a director of the local bank. He reports that his wife is living and well; one son, William C., was chief of surgery in Viet Nam and now has a surgical practice in Spartanburg, South Carolina; and his other son is an attorney and trust officer at Lincoln National Bank in Ft. Wayne. "Hope that Rush will soon be reactivated."

HANSEN, ADOLPH M., '24 (Los Angeles, California) has been suffering from osteoarthritis for the last year. He is a fellow of the American College of Surgeons and the International College of Surgeons.

MEYER, SAMUEL J., '24 (Chicago, Illinois) is professor and chairman of the Department of Ophthalmology at Chicago Medical School.

MOFFET, WILLIAM M., '24 (Santa Barbara, California) still teaches full time, but has limited his practice to endocrinology since 1930.

NEWCOMB, ALVAH L., '24 (Winnetka, Illinois) practiced pediatrics for 40 years until he retired in 1965 because of Parkinson's disease.

SIMENSTAD, LIEN O., '24 (Osceola, Wisconsin) is a trustee of the American Medical Association.

VORISEK, ELMER A., '24 (Des Moines, Iowa) left Chicago 18 years ago to set up practice in Des Moines. A year ago he closed that office and is presently serving as consultant ophthalmologist at the Knoxville Veterans Administration Hospital. He is medical advisor to the State Selective Service Director and a retired colonel in the U. S. Army Reserve. He recently purchased part of a mountain near

(Continued on page 15)

CONSTITUTION OF THE ALUMNI ASSOCIATION OF RUSH MEDICAL COLLEGE

ARTICLE I PURPOSES

1. To maintain contact and communication between graduates of Rush Medical College.
2. To honor alumni who have given distinguished service to the profession of medicine and the Alumni Association of Rush Medical College.
3. To support the reactivation of the charter of Rush Medical College.
4. To maintain the traditions and history of Rush Medical College and to perpetuate its charter.
5. To promote and encourage the highest standards of medical education.

ARTICLE II MEMBERSHIP AND DUES

1. All physicians who have received a medical degree from Rush Medical College shall be members of the Alumni Association. Other individuals may receive honorary memberships.
2. Types of membership:
 - A. *Active*—Alumni of Rush Medical College who have paid membership dues.
 - B. *Inactive*—Alumni of Rush Medical College who have not paid membership dues. Inactive members shall not have voting privileges.
 - C. *Honorary*—Membership in the Alumni Association of Rush Medical College can be extended to individuals who have not received a medical degree from the College but who have provided outstanding service to the association, or who have distinguished themselves in the medical profession. Such membership shall be awarded upon the recommendation of the Governing Council and/or the Board of Trustees of the College.
 - D. *Faculty*—Membership in the association will be offered to Rush faculty members who are not graduates of the College. Full privileges of membership will be extended to faculty upon payment of dues.
 - E. *Undergraduate*—Upon reactivation of the Rush Medical College, membership shall be extended to members of the senior class of the College. No dues payment will be asked of these members.
3. Annual dues to support the work of the Alumni Association may be asked in amounts to be specified by recommendation of the Governing Council and a majority vote of members present at the annual meeting of the association.

ARTICLE III ORGANIZATION

1. The management of the association shall be vested in the Governing Council, consisting of the national officers, a Board of Directors, and Regents of the association. Routine administration of association affairs shall be conducted by the Executive Secretary in consultation with the association President. The Executive Secretary shall be appointed by the Governing Council.
2. The national officers of the association shall include President, Vice President, and Secretary-Treasurer.
3. A Board of Directors of the association shall be established. It shall consist of five members. The Directors will assist the President and officers as requested in

matters pertaining to alumni support of the reactivated Rush Medical College.

4. The Board of Trustees of Rush Medical College shall periodically confer the title of Regent upon outstanding alumni. A Regency will be conferred on the basis of the alumnus' reputation and influence upon his medical community. He will serve as the major liaison with alumni in College and association affairs within his immediate environment.

Nominations for the title of Regent will be accepted by the Board of Trustees from any active alumnus and from the Regent's committee of the association. Regents will be elected for a two year term and may serve additional consecutive terms.

5. All national officers and members of the Board of Directors shall be nominated by a committee chaired by the immediate past president of the association. The committee shall consist of seven members in addition to the chairman. Five members should be selected from the Regents of the association on the basis of equal geographical representation (North, South, East, West, and Middle West). In the absence of a Regent to represent any particular area, an active alumnus from that area may serve. Two other members may be selected from the general active membership.

Officers and directors shall serve a two year term. They may succeed themselves if deemed necessary by the membership. Election of national officers and directors shall take place at the annual meeting and shall be accomplished by a majority vote of those attending.

6. Duties of the officers:

A. President

- 1) To conduct the annual meeting and special meetings of the association.
- 2) To direct all executive and administrative functions of the association or to delegate authority to the Executive Secretary.
- 3) To appoint chairmen of various committees, with the exception of the Nominating Committee.

B. Vice President

- 1) To assist the President as directed by the President.
- 2) To assume the duties of the President in his absence and at his request.
- 3) To serve as chairman of a standing committee.

C. Secretary-Treasurer

- 1) To act as recording secretary at the annual meeting and special meetings of the association and its Governing Council.
- 2) To serve as a member of the Finance Committee.
- 3) To present a financial report to members of the association at its annual meeting.
- 4) To disburse funds upon order of Finance Chairman and/or President.

D. Executive Secretary

- 1) To perform those tasks assigned to him by the President of the association.
- 2) To act as corresponding secretary.
- 3) To publish an Alumni BULLETIN.

(Continued on page 12)

CONSTITUTION OF THE RUSH ALUMNI ASSOCIATION

- 4) To notify membership of its annual dues obligation.
- 5) To collect and deposit dues payments to the association fund and to report all such collections and deposits to the officers of the association.
- 6) To assist Regents when necessary.
- 7) To submit an operating budget to the Finance Committee for each fiscal year.

ARTICLE IV MEETINGS

1. *Annual meeting* — An annual meeting shall be held for the purpose of electing officers and presenting alumni honors. The meeting shall be held at the same time and in the same location as the annual convention of the American Medical Association.
2. *Special meetings* — Special meetings may be called during the year by the President and the Governing Council of the association.
3. *Regent's meetings* — Regent's meetings shall be held upon the decision of the regent at a time and location to be set by him.

ARTICLE V FINANCE

1. The fiscal year shall be June 1 through May 31.
2. A committee shall be established for the purpose of accounting for and investing funds of the Alumni Association. The secretary-treasurer shall be a member of the finance committee.
3. The finance committee shall be required to approve the operating budget of the Executive Secretary.
4. The finance committee shall submit to the Governing Council an itemized report of the financial status of the association at the end of each fiscal year.

ARTICLE VI COMMITTEES

1. Committees of the association shall be formed by the President who shall appoint the committee chairman, with the exception of the chairman of the nominating committee.
2. Standing committees shall include:
 - A. Nominating—The nominating committee shall be chaired by the immediate past president of the association.
 - B. Awards
 - C. Alumni Fund
 - D. Regents
 - E. Finance
 - F. Historical

ARTICLE VII AMENDMENTS

1. Amendments to the articles of this Constitution may be added at anytime with due notice given to members of the association.
2. Amendments may be passed by a majority vote of those members attending a meeting called for the purpose of amending the constitution.

CONGRATULATIONS are given to Dr. Frank B. Kelly, Sr. '21 (left) by Dr. James W. Merrett, Rush Alumni Association president. Dr. Kelly received the second Rush Distinguished Alumnus Award in July.

LUNCHEON PARTNERS (counter-clockwise from center) Elizabeth McFetridge '30, H. Peck, Arnold Lieberman '28, Ellen Leong '26, Dr. and Mrs. George Callahan '26, Dr. and Mrs. Ewald '36.

REUNION LUNCH was enjoyed by (left to right) John Whittier '39, Marcus Block '31, '25, Nathaniel Reich '32, and William Sicher '40.

ANNUAL MEETING PHOTO PAGE 1969

Noah Barysh '33 (left) and Stanley Monroe '36 attended the annual luncheon. Dr. Barysh took several of the photos in this issue of the BULLETIN.

John Whittier '39 (left) and John Tysell '36

HOSTESS for the meeting was Dr. Alice Stewart '34. Dr. Stewart donated a bouquet of fresh garden flowers for the luncheon.

Robert Mason '29 (left) and George McIntosh '42

Abdominal Surgeons Honor Fifth Rushman—Waltman Walters '20

Waltman Walters '20 became the fifth Rush Medical College alumnus to receive the Distinguished Service Award of the American Society of Abdominal Surgeons on March 26. The award has been presented each year since 1961.

Previous Rush award winners included Lester R. Dragstedt '21, Willis J. Potts '24, Alexander Brunschwig '27, and Alfred A. Strauss '08.

Dr. Walters has been emeritus professor of surgery at the University of Minnesota since 1960. He also served as professor of surgery at the Mayo Clinic Foundation from 1934 to 1960. He is a surgeon, educator and author of more than 600 articles on medical and surgical subjects.

Born in Cedar Rapids, Iowa, Dr. Walters received his B.S. degree from Dartmouth in 1917 and his medical degree from Rush in 1920. In 1923 he took a Master of Science degree in Surgery at the University of Minnesota and in 1936 a Doctor of Science degree from Dartmouth. He also received an L.L.D. degree from Hahnemann Medical College in 1942.

He served as chairman of the surgical section of the American Medical Association in 1956 and as editor-in-chief of the AMA Archives of Surgery

and the Lewis-Walters' Practice of Surgery.

Since 1955, Dr. Walters has been a member of the Panel on Medical Science of the Office of the Assistant Secretary of Defense. He is also a member of the American, Western, Southern, and Central Surgical Associations, the Society of Clinical Surgery, a fellow of the American College of Surgeons and the American Medical

Association, a member of the International Society of Surgery and the German Surgical Society. He is 1937 Diplomate of the American Board of Surgery and of the American Board of Urology in 1935.

Dr. Walters received the Gold Medal Award for an exhibit on "Malignant Lesions of the Stomach; Importance of Early Treatment and End Results," American Medical Association 1941 (Walters, Gray and Priestley); and the Certificate of Merit for an exhibit "Cushing's Syndrome," American Medical Association, 1955 (Priestley, Sprague, Walters, Randall, Salassa and Scholz).

He is also the recipient of the Gold Medal Honor Award, Mississippi Valley Medical Society, 1954; Cine Film Award on "Cancer of the Stomach-Gastrectomy," with ReMine, American College of Surgeons, 1958; Shattuck School Alumni Award, Faribault, Minnesota, 1955, and the Dartmouth Alumni Award, 1957.

Dr. Walters is the author of "Carcinoma and Other Malignant Lesions of the Stomach," with Gray and Priestley (W. B. Saunders Company, 1953) and "Diseases of the Gallbladder and Bile Ducts," with Snell (W. B. Saunders Company, 1944).

John Lundy '20 Receives Medal of Canadian Anaesthetists Society

Internationally known specialist in anesthesiology John S. Lundy '20 is the first American to receive the distinguished service medal of the Canadian Anaesthetists' Society. The medal has been awarded only eight times in the 25 year history of the society.

Dr. Lundy founded and served as head of the Section of Anesthesiology at Mayo Clinic for 38 years. He was also a professor of anesthesiology in the Mayo Graduate School of Medicine, University of Minnesota at Rochester. He was also one of the founders of the American Board of Anesthesiology and served as its president in 1942.

While at Mayo Clinic, Dr. Lundy established its first gross anatomy laboratory. He was also responsible for many advances in the field of anesthesiology.

In 1923, Dr. Lundy developed the specifications for, and caused to be built, a four control machine for the administration of anesthetic gases; between 1922 and 1932 he developed apparatus for artificial respiration for

surgical patients; and in 1925 he devised a special syringe and equipment for local anesthesia.

His theory and practice of "balanced anesthesia" was introduced in 1925 and is widely known. In 1932,

he introduced a solution of procaine for use in spinal anesthesia, and in 1934, he contributed to the advancement of intravenous anesthesia by demonstrating the advantages of several new barbituates when employed intermittently.

In 1935, Dr. Lundy established the first blood bank in the United States. On March 17, 1942, he opened the first postanesthesia recovery room in the world at St. Mary's Hospital, Rochester. He is recognized as an authority on the mass treatment of casualties in time of disaster.

Among Dr. Lundy's many honors are an honorary degree of doctor of laws from Hahnemann Medical College of Philadelphia, and honorary degree of doctor of science from the University of North Dakota, and the distinguished service medal of the American Society of Anesthesiologists.

Dr. Lundy is a native of Seattle, Washington. He was graduated from Rush Medical College in 1920 and served his internship at Harper Hospital, Detroit.

Classnotes '20 – '29

(Continued from page 10)

Eureka Springs, Arkansas.

QUAINTANCE, PAUL A., '24 (Los Angeles, California) retired from 41 years of general surgical practice in 1968.

EDWARDS, WILMER C., '25 (Richland Center, Wisconsin) was most helpful to the Medical Museum in Prairie du Chien when they set up a display showing how teaching methods had changed over the past 40 years. He donated a large photograph of Dr. Arthur D. Bevan lecturing in the old Rush amphitheater to the classes of '23 and '24, his OB grip and portable delivery table which he used for more than 1,000 home delivery cases from 1925-40.

GRIFFEY, EDWARD W., '25 (Houston, Texas) attended the annual Academy of Ophthalmology meeting last fall. He visited with CLAUDE LAMBERT '28 who is affiliated with Presbyterian-St. Luke's Hospital. He is now semi-retired from his practice of ophthalmology. In 1962, he was selected as a guest of the Secretary of the Navy to take a 9,000 mile cruise from Norfolk to San Diego around the Horn abroad the aircraft carrier Constellation. The following year, he was elected president of the Houston council for the Navy League of America. His son, Earle, is in private practice in Brownsville, where he is also a city councilman. His daughter lives in Houston and is married to surgeon L. L. D. Tuttle. She has five children. JANSON, C. HELGE, '25 (Homewood, Illinois) was honored by his family and friends at an open house celebrating 42 years of active general

AMA Service Award Given J. A. Bergen '22

J. Arnold Bergen '22 was presented with the American Medical Association's distinguished service award at the annual AMA convention in New York City, July 15. He was chosen for the award, medicine's highest honor, by the AMA House of Delegates.

Dr. Bergen was a member of the AMA Council on Scientific Assembly for 10 years and served as chairman of the council during 1963-64. He was previously a member of the House of Delegates from Minnesota from 1948-58.

A 1922 graduate of Rush Medical College, Dr. Bergen held various professional positions at the Mayo Clinic Foundation of the University of Minnesota from 1923-48 and became an emeritus professor of medicine in 1948.

A diplomate of the American Board of Internal Medicine, Dr. Bergen is a gastroenterologist. From 1956-60, he served as chairman of the Department of Gastroenterology and Proctology at Mayo Clinic.

He was a member of the Zumbro Valley (Minnesota) Medical Society in 1956 and president of the Minnesota State Medical Association in 1957. The association awarded him

its distinguished service medal in 1959.

From 1960 until early this year, Dr. Bergen was a member of the staff and consultant in gastroenterology at the Scott-White Clinic, Temple, Texas. He is now on the staff of the Riverside (California) Medical Clinic.

Dr. Bergen was president of the American Gastroenterological Association and author of more than 200 scientific articles and four books.

practice "and I'm still going strong." He added that he was pleased to read about his classmates in the Rush Bulletin.

KILEY, MATTHEW J., '25 (Chicago, Illinois) has had hip problems since 1958. He is currently living in a nursing home.

LICHTENSTEIN, MANUEL E., '25 (Chicago, Illinois) is a professor of surgery at Northwestern University School of Medicine and Cook County Graduate School of Medicine. He presented a paper entitled "Surgical Aspects of Mental Health" to the International College of Surgeons on February 18.

LYONS, JOANNA, '25 (Westridge Rawalpindi, West Pakistan) is now Mother Mary Miriam at Adoration Monastery in West Pakistan.

MUNGER, ELBERT E., '25 (Tucson, Arizona) writes he is about to begin active practice once again after an extended interruption.

PICK, JOHN F., '25 (Chicago, Illinois) sent in his membership dues with a note, "And what else may I do to help?"

RHOADS, PAUL S., '25 (Evanston, Illinois) still has a busy practice and serves as chairman of the board of the

Institute of Medicine of Chicago.

SALLADAY, ISAAH R., '25 (Ft. Meade, South Dakota) retired in 1967 due to total disability from apoplexy. He recently moved to the V. A. Hospital in Ft. Meade.

VAUGHN, ARKELL M., '25 (Chicago, Illinois) reports that he and his wife are proud of their eight grandchildren. The Vaughns now have a "weekend retreat house" in Michigan City, Indiana.

WAKEFIELD, HOWARD, '25 (Chicago, Illinois) was elected a Master of the American College of Physicians. He is the third man in the history of Rush Medical College to receive this honor. The others were James B. Herrick and Ernest R. Irons.

WOLFFSON, SOL M., '25 (Oakland, California) retired in 1962 after 37 years in the private practice of surgery, first in Chicago and later in Los Angeles. Since then, he has been working as an industrial medical officer at the Alameda Naval Air Station. He and his wife, Dorothy have two married daughters and six grandchildren. One daughter has her Ph.D. in anthropology and resides outside of London, and the other daughter is working on a Ph.D. in dramatic arts at the Uni-

versity of California.

BLOUNT, WALTER P., '26 (Milwaukee, Wisconsin) retired last spring as head of the (autonomous) orthopaedic department of Marquette School of Medicine and is now emeritus professor of orthopaedic surgery at Marquette.

BRONSTEIN, ISADORE P., '26 (Chicago, Illinois) will retire in September as academic professor of pediatrics at the University of Illinois College of Medicine. He is 68 years old.

LEADER, SAMUEL A., '26 (Chicago, Illinois) is clinical associate professor of radiology at the University of Illinois College of Medicine and is consultant in radiology at the V. A. Hospital in Downey and the Municipal Tuberculosis Sanatorium of Chicago.

LONG, ESMOND R., '26 (Pedlar Mills, Virginia) has just finished a five year term as editor of the International Journal of Leprosy.

PULSIFER, LIBBY, '26 (Rochester, New York) has spent the past 42 years as an internist with a subspecialty in gastroenterology. She serves part time on the clinical faculty of a local medical school and is active at several hospitals. "I am married, have three children and 11 grandchildren. Still going strong and grateful."

MC DONALD, ANGUS C., '26 (Huntington Park, California) retired from active practice last September. He now enjoys raising camellias and cymbidiums in his garden.

MASTEN, MABEL G., '26 (Palm Beach, Florida) has retired from practice. She now donates her time to the Crippled Childrens Clinic, County Hospital and Visiting Nurses Association.

TOWER, LUCIA E., '26 (Chicago, Illinois) recently became emeritus professor at the University of Illinois College of Medicine. She is still in private practice and teaches at the Chicago Institute for Psychoanalysis. For diversion, she fishes for coho salmon in Lake Michigan.

WAKEMAN, J. NEWTON, SR., '26 (Springfield, Missouri) is now in his 43rd year of practice in general surgery. His son, J. Newton, Jr., is a fourth year orthopaedic resident at Parkland Memorial Hospital in Dallas. "I enjoy reading the Rush Bulletin."

BENJAMIN, EUSTACE L., '27 (Santa Barbara, California) served as pathologist at Cottage Hospital in Santa Barbara until he retired in 1965. He and his wife have two children and six grandchildren. His son is a teacher and abstract painter, and his

daughter is married to Jerry Paris, actor and director.

WOODRUFF, LEWIS W., '27 (Joliet, Illinois) is still practicing internal medicine. He has two partners and is adding a third in July.

BURKE, MEADE, '28 (Madison, Wisconsin) retired from active practice in December 1968.

CAMPBELL, PAUL A., '28 (San Antonio, Texas), Colonel USAF (retired) and former Commander of the USAF School of Aerospace Medicine, was awarded the Melbourne W. Boynton Award at the annual Honor's Night Banquet of the American Astronautical Society last May for "pioneering studies in aviation and space medicine as well as space rescue." He was one of the first four interns chosen to open Billings Hospital. Dr. Campbell was associated with Dr. Boynton in the early years of the hospital and later during World War II when they both were in aeromedical research for the Air Corps. He is presently chairman of the Space Rescue Study Committee of the International Academy of Astronautics.

CARRELL, RUSSELL C., '28 (Maitland, Florida) served a surgical internship at Cook County Hospital and his residency at Augustana Hospital. He was a surgeon and medical director for Standard Oil Company (New Jersey) with a 130 bed hospital and a staff of 276. With an annual operating budget of \$3,500,000, the staff served approximately 35,000 employees and their families.

GELBER, ANITA, '28 (Los Angeles, California) spent the holidays on the S. S. Italia cruising in Mexican waters. RATNER, REUBEN, '28 (Beverly Hills, California) reports that he is enjoying newly married life. The happy day was September 1, 1968. He recently visited the medical centers of New Zealand and Australia with the University of Southern California postgraduate tour.

SHORE, FRED A., '28 (Ventura, California) retired in 1965. His time is now divided between serving on the local hospital board, the Visiting Nurses Association board and growing citrus and avocados.

ABBOT, GORDON W., '29 (Elgin, Illinois) is now in partnership with his son, Edward, who is a 1957 graduate of the University of Illinois. Edward was named after Dr. Abbott's father who was an 1895 graduate of Rush. BOURKE, HENRY P., '29 (Oceanside, California) is retired and recently moved from Florida to California. "California oranges taste better."

HILLER, GRACE, '29 (Baltimore, Maryland) has been spending a lot of

time traveling. She recently returned from a tour of Southern Europe with the American Association of Retired Persons. Last year she visited Scandinavia. With her on the tour were DR. and MRS. JULIO PAEZ '24.

HOGBOOM, CLAYTON F., '29 (Baker, Montana) was elected secretary-treasurer of the Southeastern Montana Medical Society for 1968.

JOHNSON, CARL A., '29 (Tucson, Arizona) has been working on circulation research since his days at the University of Chicago. He recently sent the association reprints of articles entitled "Pulsate Movements of the Eyeball," "External Mobility of the Eardrum," and "Vascular Studies of the Ear." He reports that he can now make precise recordings of blood pressure of the finger. He still keeps his office and sees some patients. During July and August, he stays at his cherry farm in Traverse City, Michigan where he enjoys the visits of his children and grandchildren. He and his wife have four children. Their two sons are a Ph.D. in theoretical organic chemistry and an ophthalmologist. One daughter majored in bacteriology and the other taught school until her marriage.

KANTZER, FLOYD B., '29 (Los Lunas, New Mexico) moved to New Mexico and began working with the Los Lunos Hospital and Training School on February 3, 1969. He has long been interested in working and caring for retarded children. He works a 40 hour week which is less strenuous than private practice. Dr. Kantzer recently suffered a coronary infarct which required him to slow down.

LEVINE, VICTOR, '29 (Chicago, Illinois) has served as director of Metro Laboratories for the past 25 years. Management of the laboratories was recently taken over by PASCO Medical Laboratories and Dr. Levine will continue as medical director for some of the laboratories as well as be on call for consultation and special consultative service in forensic pathology and medicine.

MASON, ROBERT J., '29 (Birmingham, Michigan) has been named president-elect of the Michigan State Medical Society.

MCMASTER, PAUL E., '29 (Beverly Hills, California) recently completed his term as vice president of the American Orthopaedic Association.

MURRAY, JONATHAN H., '29 (Burlington, Iowa) is still in private practice. His wife, Marie, is now his private secretary. Their four daughters are all married and have children.

(Continued on page 17)

CLASS OF '26 had a small reunion at the Alumni Association's annual meeting in New York City. George Callahan met classmate Ellen Leong (right) after many years. Mrs. Callahan attended the meeting with her husband.

Classnotes '20 - '29

(Continued from page 16)

SHAW, NOEL G., '29 (Evanston, Illinois) was recently elected chairman of the Illinois Interagency Council on Smoking and Health. It is a group of 20 voluntary and official health agencies concerned with the problems of smoking. He recently wrote the "Care

of the Premature" in the 1969 book "Current Therapy." In conjunction with the Institute of Medicine and the North Cook County Heart Association, Dr. Shaw recently arranged a series of talks for the public at St. Francis Hospital in Evanston. They covered heart attacks, surgery of the heart and vascular problems, strokes and rehabilitation, and heart disease in children.

Classnotes '30-'39

DE COSTA, EDWIN J., '30 (Highland Park, Illinois) is attending obstetrician and gynecologist at Passavant Memorial Hospital and professor of obstetrics and gynecology at Northwestern University Medical School.

GASTON, HERBERT B., '30 (Dearborn, Michigan) is chief of the Department of Obstetrics and Gynecology at Oakwood Hospital in Dearborn. His daughter, Jeamme, is married to Dr. Larry Feherenbaker, a resident fellow at the Mayo Clinic.

LECKBAND, NORBERT, '30 (Arlington Heights, Illinois) is "gradually retiring," reports Mrs. Leckband. He enjoys walking and bicycling in the forest preserves. His eldest son, Norbert, was assigned to the USS Enterprise in Vietnam. He is a lieutenant commander. Son George recently passed his National Boards in internal medicine. He is completing his fellowship in cardiology. Youngest son, Richard, is district representative for Micro Publications, Inc. in Naperville, Illinois. Daughter Joanne is married to an attorney and has four children. SIPPY, H. IVAN, '30 (Chicago, Illi-

nois) managed to recover from a minor traumatic vacation calamity with the help of J. PAUL KLEIN '38 in Fremont, Michigan.

WICK, SAMUEL, '30 (Phoenix, Arizona) resigned his position as director of psychiatry at Arizona State Hospital in 1963 after 10 years. He is now in private practice. Says he "enjoys the absence of budget hassles with the state legislature."

WOOD, WILLARD L., '30 (Chicago, Illinois) is a consultant in medicine at Presbyterian-St. Luke's Hospital and a clinical professor emeritus at the University of Illinois College of Medicine. BAY, ANTHONY, '31 (Chicago, Illinois) has been in general practice since 1932.

BLOCK, MARCUS T., '31 (Newark, New Jersey) is clinical instructor in dermatology at the New Jersey College of Medicine and Dentistry, a position he plans to maintain until he reaches his 68th birthday. His son, Marcus T. Jr., completed four years with the U. S. Air Force and is presently studying premed at Morris Harvey College, Charleston, West Virginia.

DOTY, HORACE W., '31 (Salt Lake City, Utah) retired from the U. S. Army in 1960 after service in World War I, II and Korea. He is presently serving as chief of geriatrics service at

Carl Dragstedt '22 Turns Poet During Retirement

Poetry has become a part-time pastime for Carl Dragstedt '22. About 90 percent retired and living in Park Ridge, Illinois, Dr. Dragstedt has also been doing editorial work for two publications: Clinical Clippings and ClinAlert.

Dr. Dragstedt recently sent us one of his efforts. He says, "When one awakes during the night, it's better than counting sheep."

SEXICARE

*We who have reached maturity,
Have a sociable security,
But things are not as kosher
As they seem.*

*While planning our futurity,
There was too darn much obscurity
With reference to the thing
We most esteem.*

*To be sure we now have Medicare,
And Denticare and Pedicare,
But these can only soothe
Our minor needs.*

*While every time we brush our hair,
We yearn for better Sexicare,
And we don't want monthly
pay-checks,*

We want DEEDS!

—Carl A. Dragstedt

Utah State Hospital . . . learning more and more geriatrics and less and less psychiatry. He and his wife have two children and six grandchildren.

SLOAN, JACK H., '31 (Chicago, Illinois) is senior attending physician, department of medicine, Michael Reese Hospital. His son, William R., is a graduate of the University of Chicago School of Medicine and completed his internship last June at Michael Reese. He is currently serving in the U. S. Navy.

SERON, ZAVEN, '31 (Fresno, California) has settled down in a new home and practice in Fresno. He is engaged in a new type of practice for this area . . . house calls only. "Not bad for a 70 year old, eh?"

STACKHOUSE, STERLING P., '31 (Rome, New York) sends his congratulations to those alumni who designed the Rush membership certificate.

STEICHEN, EDWARD F., '31 (Lenora, Kansas) is serving his second term in the Kansas House of Representatives. During the past year, he covered all of Europe, Russian satellite countries and parts of Russia on a Legislators tour and Kansas Physicians' People-to-People tour.

TERRY, ALBERT A., '31 (Austin, Texas) writes that he hopes Rush can

(Continued on page 19)

How One Barefoot Boy from the West Entered Rush

(EDITOR'S NOTE: Dr. Morris H. Jones, Jr. '26 was kind enough to send the BULLETIN "a chapter of a never published book I wrote." Space limitations do not allow us to print the entire chapter; however, we are happy to share the first portion describing his arrival at Rush Medical College. If any alumni would like the entire article, we will be happy to send it to you. Dr. Jones now lives in Oak Park, Illinois and is on the staff of West Suburban Hospital.)

My medical career damn near didn't get off the ground on account of sore feet. I had stopped in Dallas and, as his going away gift, my Uncle Sam Jones had given me a pair of slightly used, very pointed shoes, carefully impressing upon me the value of first impressions. This seemed persuasive as he was quite a successful fellow but logic could not overcome the fact that they were one size too small. As soon as I got on the train I took them off and resumed the old brogans. Nearing Chicago I spruced up, including the donated foot-gear. Some well-travelled elder citizen of my home town had vaguely briefed me that the Elevated was the simplest route to Rush Medical School. A policeman aimed me in the right direction and away I went. There was a slight error in the con so I got off at 63rd and Stony Island, the end of the line. An optimistic local inhabitant explained that the University of Chicago was within walking distance and told me which streets to take so, with Boy Scout compass in hand, complete with two large suitcases, I took off for destiny. Nothing in my constricted career had prepared me for that hike along 63rd Street. The El roared overhead. Red street cars by the dozen, more automobiles than I had ever seen and such a multitude of shops and stores distracted me so that I had gone about five blocks before I had my first pedal twinge. Another block or two and the painful feet took over the show. I tried long steps and short steps. I rested, both upright and sitting on a suitcase with no surcease. The obvious answer was simply to change shoes but inexperience and the noxious stimuli of the big city combined to get the panic button pushed full on. After a northward turn. I finally saw the great grey stone buildings of my destination. Water to thirsty desert wanderer could not have looked more welcome.

At this point the world consisted of

ENGINE ENTHUSIAST—Morris Jones '26 now ranks old engines as one of his hobbies. This brass 1835 French locomotive coffee-maker is his prize possession.

nothing but my brain and my gosh-awful pulsating two feet. Some kindly soul, dimly seen, directed me to a basement men's room. With trembling fingers I tore off those leather iron-maidens. Moans of relief burst forth and joy suffused my countenance. The world was without problems. Sitting on the porcelain throne I took off my sox and gently caressed the tortured members. Time went by and the dogs were relatively comfortable, so now on to register and get shelter for the night. I reached for the new shoes. They simply wouldn't fit. Time plus trauma equals edema. Push, pull to no avail, swelling was in command. Time was passing and something constructive had to be done so I overcame my distaste and crane-like, alternately soaked each one in the toilet bowl. The only result was the necessity of drying them on one of my few pairs of clean sox.

Completely defeated, craving non-available invisibility, shoes under my arm and lugging the suitcases I registered and was assigned a room just before the office closed.

I'm not sure but I suspect that I was the only barefoot boy that ever entered the distinguished portals of Rush.

Maybe memory fades and nostalgia nibbles the fabric of facts. Medical

schools and students in those deeply past days of 1921 to 1926 seemed warmer and more human than those of the current generation. For one thing there were almost no married medical students and the ones that were stayed so anonymous that no one ever heard of them. In these modern days an appreciable percentage are married and have spawned by the time they have taken their undergraduate degree. Any hospital without quarters for addicts to wedded bliss might just as well be offering postgraduate work in witch doctoring for all the applicants they would get. The new way may be better. Certainly a case can be made for the contribution that family stability makes toward good study habits but what a horrible deficit it leaves in fun and memories.

There is no doubt but that we were an unsophisticated and poverty stricken group in contrast to the present generation. Turned loose in a big city, most of us for the first time, and challenged by medical education that was about to burgeon into its most spectacular period of discovery and advance, we stored up recollections that stimulate and stay green much longer than looking back on the fact that little junior had colic while father was taking his final in Embryology I.

Marcus Block '31

Classnotes '30 - '39

(Continued from page 17)

be reactivated as a medical college. "I'm all for it."

BAKER, MARSHALL Q., '32 (Los Angeles, California) retired in 1965 after 28 years of practice in internal medicine. His son, Steve, is completing this third year at Chicago Medical School where he taught in 1933-36.

BURNS, MALCOLM O., '32 (KalisPELL, Montana) is still in general practice. He reports that MARCY AU-RORA SOUTHWICK of the department of pathology recently celebrated her 90th birthday in nearby Bigfork. She is still hale and hearty.

GINSBERG, JULIUS E., '32 (Chicago, Illinois) reports that he is enjoying the reward of 60 hair transplants which has restored the hairline he had at Rush in the late '20's. Dr. Ginsberg says he has "the satisfaction of doing the same for others."

GOLDING, GEORGE T., '32 (Forest Hills, New York) is chief of urology at LaGuardia Hospital. His son is attending the University of Southern California.

KAPLAN, SAUL H., '32 (Miami Beach, Florida) is still in active practice as an internist after 30 years.

KINGSLEY, DANIEL M., '32 (Alexandria, Louisiana) served as president of Rapides Parish Medical Society in 1966, president of Louisiana Orthopaedic Association in 1967, and in 1968 was program speaker for the Clinical Orthopaedic Society.

KROEGER, HILDA H., '32 (Pittsburgh, Pennsylvania) is director of the medical and hospital administration program of the Graduate School of

Public Health, University of Pittsburgh, and professor in public health practice.

WAGENAAR, EDWARD H., '32 (Muskegon, Michigan) is practicing pediatrics.

CHRISTIANSON, OSCAR O., '33 (Spokane, Washington) has served as pathologist and director of the clinical laboratory at St. Luke's Hospital, Spokane, since 1945 and medical director of the Spokane and Inland Empire Blood Bank since 1948. He plans to retire in April.

COOPER, ARTHUR L., '33 (Somerset, Kentucky) retired in 1965 after four coronary attacks. He is now wearing a pacemaker.

FREDBERG, CLIFFORD W., '33 (Rockford, Illinois) retired last July from general practice. He is now engaged part time in the medical service department of the Singer Zone Mental Health Center.

FLIEK, ALAN A., '33 (Evanston, Illinois) is currently Public Health Director of the North Shore Health Department. His son is serving in Vietnam and a daughter lives in Taiwan. Dr. Filek has six grandchildren.

GILBERTSEN, CECIL R., '33 (Janesville, Wisconsin) is retired "in a way but working hard." His wife is dean of women at Beloit College; one son plays trombone with the Chicago Symphony Orchestra; another son is a senior at Beloit and is medically motivated. Their daughter is married and has one daughter.

NELSON, JAMES A., '33 (Bakersfield, California) writes that he hopes Rush can be opened as a four year school . . . better two years than nothing. "Keep up the pressure on the right people and prospects . . . more doctors are needed."

NEWMAN, LOUIS B., '33 (Chicago, Illinois) is professional lecturer in physical medicine and rehabilitation at the University of Illinois College of Medicine and consultant in rehabilitation medicine at V. A. Hospitals in the Chicago area.

SIDES, HOLLIS E., '33 (Huntington Park, California) has had an obstetrics and surgery practice for the past 35 years. He has been practicing part time following a recent coronary attack. He plans to retire on a cattle ranch in Cathey's Valley, California.

SMITH, ERMA A., '33 (Wichita, Kansas) is engaged in the private practice of medicine.

CAMPBELL, RUNDLE D., '34 (Mansfield, Ohio) is looking forward to having his son and daughter-in-law join his practice when they finish their residencies in general surgery and medi-

cine at Saint Luke's Hospital, Shaker Heights.

DE PINTO, ANGUS J., '34 (Phoenix, Arizona) has an active obstetrics and gynecology practice. He is very happy in Phoenix and proud of his four children and eight grandchildren. Both E. HENRY RUNNING '35 and JOSEPH C. EHRLICH '35 are practicing in Phoenix.

HENRICHS, MARIE A., '34 (Riverside, Illinois) is medical consultant for health education of the American Medical Association. She is a contributor to the Harvest Years magazine with a question and answer column.

PHELPS, MC KINNIE L., '34 (Denver, Colorado) reports that his oldest son was in Viet Nam and "seeing all too much action." He finished his internship last spring at Cincinnati General. One of his twin sons, an officer in the U. S. Navy, returned from a long stretch in the Gulf of Tonkin and is now assigned on a guided missile destroyer leader. The other twin is completing his Ph.D. in hospital administration at the University of Chicago.

PUTNAM, GEORGE H., '34 (North Fort Myers, Florida) gave up his surgical practice two years ago because of ill health. He and his wife moved to Florida where he has a very limited general practice as an insurance examiner. They have two children . . . a daughter who lives in Atlanta and recently had a baby boy, and a son who resides in Winter Park with his wife, son and two month old daughter. He is associated with Abbott Laboratories. SMAIL, W. CARLYLE, '34 (Jerome, Idaho) has a general practice with a high percentage of surgery done lo-

(Continued on page 20)

(Continued from page 19)

cally. He and his wife have three children. One son is a surgical resident at the University of Colorado Hospital; another son is chief buyer for a computer manufacturer; and their daughter is taking her junior year in Switzerland and will return to the University of Colorado for her final year. He writes that life is quite different in Idaho . . . not too many city advantages but most delightful with no pressures. He does a great deal of hunting and fishing and plays golf daily during the summer.

CARBONE, JOSEPH A., '35 (Gary, Indiana) is a pediatrician at the Gary Clinic, chief of pediatrics at Mercy Hospital and has been a member of the staff of Methodist Hospital for over 25 years.

CURTIS, WILLIAM L., '35 (Seattle, Washington) is director of the x-ray department at Seattle Medical and Surgical Clinic.

FITTS, RALPH L., '35 (Grand Rapids, Michigan) is a member of the board of the Michigan Diabetes Association, the committees on rehabilitation and aging of the Michigan State Medical Society, and the International College of Tropical Medicine.

FLEMING, ARTHUR W., '35 (Ann Arbor, Michigan) received his master of public health degree from the University of Michigan in 1968. He is associate director and coordinator for clinical services for the Institute for Study of Mental Retardation, associate professor of maternal and child health for the School of Public Health, and clinical professor of pediatrics at the University of Michigan School of Medicine.

FRADKIN NATHAN F., '35 (Londonville, New York) was recently promoted to attending physician and gastroenterologist at the Albany Medical Center.

HALL, DURWARD G., '35 (Springfield, Missouri) was recently re-elected to the 91st Congress.

JANSON, HERBERT '35 (Homewood, Illinois) reports that his son David was graduated from the Interlochen Art Academy.

LEWY, ROBERT B., '35 (Chicago, Illinois) lectured last year at Oxford, Lund and Basal Universities and elsewhere in Europe on "Vocal Cord and Voice Rehabilitation." He is in private practice, does clinical research and teaches at the University of Illinois College of Medicine and the Veterans' Administration.

LOOBY, WILLIAM E., '35 (Pueblo,

Stanley Monroe '36

Colorado) and his wife were in San Francisco for the Rush meetings. Unfortunately, he never made the meetings as he developed severe cervical pain which subsequently proved to be calcified extruded discs. He flew back to Colorado for the surgery. He is chief of surgery at Colorado State Hospital which is presently making plans to enlarge and be affiliated with the University of Colorado Medical School. It will also be an adjunct hospital to Colorado General. He and his family are very happy in Colorado and "don't miss the Illinois climate at all."

MYERS, THOMAS T., '35 (Rochester, Minnesota) has retired as chairman of vascular surgery at Mayo Clinic and is now senior consulting surgeon. He boasts quite a medical family. His wife, the former Lee Todd, is a graduate of the Presbyterian Hospital School of Nursing. His son is a dermatologist at the St. Louis Park Clinic. He has three daughters. One is married to a doctor in Milwaukee and is also an occupational therapist although she does not practice. Dr. Myers' father was a country doctor in Kansas. His nephew is a professor of radiology at the University of Florida.

OLSEN, ARTHUR M., '35 (Rochester, Minnesota) is president-elect of the American College of Chest Physicians. In June, he planned to attend the Asia Pacific Congress of Diseases of the Chest in Kyoto, Japan.

RUNNING, E. HENRY, '35 (Phoenix, Arizona) writes that he is "still alive."

SCHNEIDER, MAURICE, '35 (Los Angeles, California) is an anesthesiologist at St. John's Hospital in Santa Monica. His wife, Rea, is a clinical

professor of medicine at the University of Southern California and has a private practice. Daughter Laura is a registered nurse and married to a medical student at UCLA. Son Andrew has recently graduated from high school and plans to study theatre arts.

SEIT, MYRON, '35 (New York, New York) has retired as colonel in the U. S. Army Reserve and is on the faculty of the New York University Medical Center. He serves on the staffs of Bellevue, New York University and New York Polyclinic Hospitals. He is also a senior examiner for the Federal Aviation Agency.

SLOTT, IRVING, '35 (Chicago, Illinois) practices internal medicine and is a Diplomat of the American Board of Internal Medicine.

ARTHUR, BARBARA PREU, '36 (Rochester, New York) has an obstetrics and gynecology practice and is on the attending staff at Rochester General Hospital.

BELINSON, LOUIS, '36 (Jefferson City, Missouri) is superintendent of Lincoln State School, clinical assistant professor of psychiatry, University of Illinois College of Medicine, and lecturer in hospital administration at Washington University, St. Louis. His two sons are both graduates of the University of Missouri School of Medicine. One son is serving his internship at Michael Reese Hospital, and the other son, following service in Viet Nam, is taking his residency in anesthesiology at the University of Virginia Medical Center.

BRENNECKE, FRANCIS E., '36 (Rockville, Maryland) is now qualified in psychiatry after many years as an orthopedic surgeon. "Psychoanalytically oriented therapy with young people is work but it keeps me abreast of current youth."

DORRANCE, THOMAS O., '36 (Bluffton, Indiana) is a pediatrician associated with the Caylor-Nickel clinic group in Bluffton.

HOFFER, EMIL F., '36 (Huron, South Dakota) and his wife spent 19 days in Mexico City and had a great time at the Olympics. In November, they welcomed their first grandchild.

LUDWIG, J. LAFF, '36 (Los Angeles, California) is practicing internal medicine.

MARKOWITZ, MARTIN, '36 (Brooklyn, New York) is president of the King County Academy of General Practice. His son recently completed his junior year at the University of Chicago School of Medicine.

NEUKAMP, FRANK H., '36 (Connersville, Indiana) has an active sur-

(Continued on page 22)

Walter Sackett '38 Campaigns for "Death with Dignity" Bill

(EDITOR'S NOTE: Dr. Walter W. Sackett, Jr. is a member of the Rush Medical College class of 1938. The following article has been reprinted from the MEDICAL WORLD NEWS.)

In the 30 years he has been practicing medicine in Miami, Dr. Walter Wallace Sackett, Jr. has never given up trying to help his patients stay alive. And, as Rep. Walter Sackett of Florida legislature, he is determined to change the state's constitution to make "death with dignity" a basic right of every citizen.

The doctor-lawmaker is convinced that most of his fellow legislators believe in his "death with dignity" concept, even though they defeated it by voice vote at the 1968 special session in Tallahassee. Dr. Sackett will try again this year. He has prepared a bill that would make it legal for a physician to let a hopelessly sick person die.

The bill was not sent to the Florida legislature's Health and Welfare Committee, where it might have been handled by lawmakers sensitive to medical problems. Instead, it went to the General Legislation Committee, which is widely regarded as a bottomless pit for any proposal that Florida's House leadership feels skittish about.

Dr. Sackett knows he will have a tough time getting the bill out of committee when the legislature meets in April. The House minority leader has

already indicated concern. Rep. Don Reed, Boca Raton Republican, asked Dr. Sackett if relieving a physician of the legal responsibility to do everything possible to sustain life would also relieve the physician of his medical oath.

Dr. Sackett replied, "It would not. But it might keep a smart lawyer like you from suing me someday."

It was not an unusual reply from a Catholic doctor who has nevertheless advocated abortion when it is needed and wanted, who has said that drinking milk is more harmful than smoking cigarettes, and that children should be weaned on coffee and should be frustrated a little, not coddled.

Dr. Sackett says lawmakers back away from the idea of death with dignity as a subject too delicate to consider. "Yet when I ask these same people what they would want to happen with themselves, they say they would want the doctor to pull the tubes and stop the pumps."

The problem today, notes Dr. Sackett, is that medical science knows more about keeping people alive than it does about keeping them well. "We have got to teach young doctors to keep meaningful life going."

He wants the law to spell out carefully the precautions physicians must take before making the decision to stop the struggle to maintain life. "We can keep some people alive indefinitely. But that is no miracle. It is inhuman."

To back up his case for the legislation, the Miami physician has a file of letters, mainly from the elderly, congratulating him for his thwarted effort last year. His correspondents tell of suffering and economic hardship imposed on relatives of terminal cancer patients.

Dr. Sackett believes that many doctors are afraid to come out in favor of his proposal because, as seeming supporters of euthanasia, they would be subject to public criticism. He insists on keeping the subject of euthanasia separate from "death with dignity." Many doctors who know of his proposed bill have privately indicated their support of his attitude.

Dr. Rufus K. Broadaway, for one, agrees. The president-elect of the Dade County Medical Association, he thinks a majority of doctors are very much in accord with Dr. Sackett's proposed legislation, although he can't recall any formal discussion within the association. For himself, he believes

that when a person's life span is up and the prospect of death becomes obvious, "we should do the humane thing." But, he added, sometimes the family insists that the battle be continued. "And then the doctor has no choice."

Dr. Joseph H. Davis, who is a member of the DCMA executive committee and is also Dade County's medical examiner, believes a doctor does no favor to the patient, to the family, or to society when he persists in achieving a medical miracle by sustaining life in a body that is no longer salvageable. He points out that there comes a time in an illness when all effort should be aimed at comforting the patient and providing the drugs necessary to ease pain.

He recalls the case of a terminal cancer patient who asked to be released from a government hospital so he could go home to watch the sunsets from his own porch. The patient got his wish, but the hospital administrator was upset that the patient had been allowed to go home to die. Yet, as Dr. Davis notes, "This was the beautiful way for the patient."

PRESIDENT-ELECT Paul P. Pickering '41 has been named president-elect of the American Society of Plastic and Reconstructive Surgeons, Inc. Dr. Pickering is chief of the plastic surgery section and an associate professor at the University of California School of Medicine. He will assume the presidency of the organization this fall.

(Continued from page 20)

gical practice and serves as chief of staff at Fayette Memorial Hospital. "I hope that Rush can be reactivated on a four year basis. I am willing to be of any service that I can."

OLDS, JOHN W., '36 (San Diego, California) writes "same old rat race . . . retiring in 1969. Kindest regards to all."

PERLSON, JOSEPH, '36 (San Bernardino, California) recently completed his 26th year as chief of the department of neurology and psychiatry at the San Bernardino County General Hospital. Last summer, Vantage Press published his book "The Dog — An Historical, Psycho-Biological and Personality Study."

SIMISON, CARL, '36 (Barnesville, Minnesota) was honored by the community last October for 32 years of service. More than 2,000 people attended the "Doc Simison Appreciation Day" reception. He also received 2,200 letters and cards including telegrams from Pat Paulsen, Hubert H. Humphrey, Richard Nixon, congressmen and others. Hundreds of the babies he brought into the world were there, called or sent cards. The community gave Dr. and Mrs. Simison a trip to Europe to visit a foreign exchange student who had lived with them.

TYSELL, JOHN E., '36 (Eugene, Oregon) reports that "Pa and Ma are fine." They have three sons. John, Jr. is serving a medical residency at Santa Clara Valley Medical Center, Jim begins medical school next fall and Bruce is a high school senior.

AILTS, BERNARD H., '37 (Abilene, Texas) has "30 years of practice behind me and the gray hair to prove it." He is practicing internal medicine and allergy. Another classmate, PHILIP S. GOLD '37 lives just 70 miles away in Brownwood, Texas.

ARONOFF, JACOB S., '37 (New York, New York) received the Diplomate of the American Board of Otolaryngology in 1943 but has specialized in facial plastic surgery for the past ten years. Each fall, he spends eight to ten weeks demonstrating the American techniques in rhinoplasty throughout the world.

BROEN, ELMER, '37 (Torrance, California) visited JOHN CARNEY '37 early this year. Dr. Broen reports, "He has just as much zip now as he used to have at the AKK dances when his friend and partner was Old Crow and a statue from the staircase."

DOLLIN, MARTIN, '37 (Kew Gardens, New York) is assistant clinical

professor of psychiatry at the new Mount Sinai School of Medicine.

ECKLUND, EFFIE M., '37 (Oak Park, Illinois) retired from private practice in April 1968 and has joined the staff of Mount Sinai Hospital. She works one day a week in the eye clinic and teaches medical students. She also volunteers at Marcy Center Settlement House screening nursery school and kindergarten children for EENT. She is on the board of Marcy-Newberry Association of Rural India Project and the Women's Society of her Church.

EVANS, GEORGE T., '37 (Fairmont, West Virginia) has an obstetrics and gynecology practice and is chief of obstetrics and gynecology at Fairmont General Hospital. He has served as secretary of the County Medical Society since 1946 except for two years when he served as president. His oldest son is serving his residency in internal medicine at the University of California, San Francisco; his daughter's husband is interning in Charlotte, North Carolina; and his youngest son is in pre-med at West Virginia University.

FREEMAN, WILLIAM N., '37 (Colfax, Washington) is still in active practice at the Colfax Allergy Clinic. His son, William Jr., has recently started his residency in head and neck surgery at Johns Hopkins, and his youngest son enters medical school next fall.

GREENMAN, ROBERT B., '37 (Oakland, California) was in Mexico last fall during the Olympic games — "enjoyed the excitement of the competition of many events, the charm of the Mexican people, the frustrations of the traffic in Mexico City, the tropical climate of Acapulco and beautiful Acapulco Bay."

GAZDA, MACE, '37 (Chicago, Illinois) would welcome the new Rush Medical College as would his son for admission.

HYMAN, MAYER, '37 (Tucson, Arizona) has practiced internal medicine in Tucson since 1946. He has served as chief of staff of the Tucson Medical Center, governor of the American College of Cardiology for the state of Arizona, and a member of the board of directors of several voluntary health organizations. "I am about to complete my duties as a member of the board of directors of the Arizona Blue Cross as well as the local County Medical Society. I look forward to a period of 'post influential asthenia'."

JACOBS, NATHAN, '37 (Sierra Madre, California) has two sons in medicine. One is serving his residency in anesthesiology at UCLA and the other son has completed his internship and is awaiting military assignment.

MEACHAM, EDWARD T., '37 (Kent, Ohio) retired in 1967 from general practice after 29 years. For the past two years, he has served on the staff of the health service at Kent State University.

NELSON, HAROLD O., '37 (Guadalupe, California) served as Colonel in the Medical Corps, U. S. Army, until his discharge in 1968.

LEDERER, HENRY D., '37 (Richmond, Virginia) has been professor and chairman of the Department of Psychiatry of the Medical College of Virginia since 1963. This July, he will become director of Intramural Training and Education at U. I. M. H.

NELSON, JOHN A., '37 (Longview, Washington) has been practicing general medicine for the past 30 years.

OCKO, FELIX H., '37 (Berkeley, California) retired in 1961 after a 25 year career as Medical Officer in the U. S. Navy. He entered private practice as a psychoanalyst in 1961 and has served as director of psychiatric training and chief of psychiatry at Herrick Memorial Hospital. He has two children, both married, and one grandchild. His son is a doctoral candidate in Chinese history at Yale University.

PITLICK, WILLIAM J., '37 (Los Angeles, California) is quite proud of his family. Daughter Frances received a Ph.D. in biochemistry and is now with the biochemistry department of Yale University. Son William is a pharmacist at Long Beach Pacific Hospital. Son Paul has a masters degree in engineering sciences from Notre Dame and Stanford and is now in his third year of medical school in St. Louis. His youngest son, John, is in high school but plans to be a doctor.

SILVER, CAROLL M., '37 (Providence, Rhode Island) spent four months in Australia on a Fulbright travel and teaching grant.

SIMISON, EUGENE V., '37 (Pocatello, Idaho) is dean of the College of Medical Arts of Idaho State University.

STRATTON, J. DAVID, '37 (Charlotte, North Carolina) is chief of the Department of Ophthalmology at Charlotte Memorial Hospital. He is president of the North Carolina Otolaryngological and Ophthalmological Society. Son James received a four year Morehead Fellowship to North Carolina School of Medicine at Chapel Hill. Son Robert plans to enter medicine in 1970 after graduating from Wooster College.

STROHMEIER, OTTO E., '37 (Evanston, Illinois) sends his best wishes for continued success to Rush and the Alumni Association.

(Continued from page 22)

TEPPER, VICTOR, '37 (Irvington, New Jersey) attended the American College of Surgeons meeting in Atlantic City last October. He met some of his University of Chicago friends but was disappointed not to see any of his Rush classmates. "I would love to see some revitalization of interest generally."

GRAY, LEE, '38 (Santa Barbara, California) says he is anxious to hear of progress in getting Rush started again.

GREEN, GEORGE B., '38 (Arlington, Virginia) retired from the Air Force after 20 years of service and is now with the Federal Drug Administration in the division of drug experience concerned with adverse drug reactions. "I enjoy reading about Rush men, especially the fine gentlemen in the class of '38."

LINN, LOUIS, '38 (New York, New York) is associate clinical professor, department of psychiatry, at Columbia University and lecturer, department of psychiatry, Mt. Sinai Medical School. He has one daughter who is married to a hematologist and his son is a senior at Haverford College.

NEIMAN, IRVIN S., '38 (Seattle, Washington) received 30 year pin with mixed emotions . . . "didn't know I was so old."

MAMICK, STEPHEN, '38 (Welch, West Virginia) continues his practice in the southern coalfields of West Virginia where he is on the staff of Stevens Clinic Hospital.

ROBBINS, LEWIS L., '38 (Glen Oaks, New York) is completing his 10th year as medical director of Hillside Hospital, a psychiatric teaching, research and treatment hospital. In addition, the hospital has professional responsibility for the psychiatric service at Queens Hospital Center, a 1000 bed city hospital. He is a member of the executive council of the American Psychiatric Association and a clinical professor of psychiatry at State University of New York, Downstate Medical Center, and a supervising psychoanalyst at Columbia University Psychoanalytic Clinic for Training and Research.

SACKETT, WALTER W., JR., '38 (Miami, Florida) has been in private general practice in Miami since 1941 and is a member of the staffs of Doctors, Jackson Memorial, Variety Children's Dade County and Baptist hospitals. He was one of the pioneers in oral polio vaccine in newborns in 1960. In 1966, he was elected to the

DE KALB MEDICAL CENTER was opened in 1958 by six Illinois Physicians. James Ellis '27 and Ralph McMcAllister '33 were two of the organizing members. The building is air-conditioned and contains a pharmacy, clinical laboratory, x-ray department, and physical therapy department.

Florida House of Representatives and was recently re-elected to the Florida Legislature.

SEELY, CLARK W., '38 (Kansas City, Missouri) is associate director of Childrens' Mercy Hospital. He left private practice in July 1967.

WATT, LUCILLE, '38 (Chicago, Illinois) has become a senior attending anesthesiologist at Passavant Hospital after heading the department for 15 years.

HILKER, ALBERT W., '39 (Eau Claire, Wisconsin) has been practicing internal medicine at the Midelfort Clinic for the past 22 years.

HILTON, HIRAM D., '39 (Lincoln, Nebraska) formerly served as chairman of surgery at Bryan Memorial Hospital. He is now chief of staff, assistant clinical professor, at the Uni-

versity of Nebraska College of Medicine. He recently spent several months in Russia on a surgical exchange.

JANSSEN, MARTIN E., '39 (St. Paul, Minnesota) assumed the position of director of medical education at the Charles T. Miller Hospital last January. His son has his master's degree in physical education from Indiana University, and his daughter, a graduate of Smith College with two master's degrees in theater and education from Wesleyan, is married and her husband is presently at the University of Chicago studying for his Ph.D. in english.

ZECH, VERN L., '39 (Lake Bluff, Illinois) hopes that the day will soon come when "some of us in the Chicago area might also be able to make a teaching contribution to a reopened Rush Medical College."

Swiss Physician Named Ralph Brown Professor

George Forster, M.D., chief resident of the Medical Polyclinic of the University of Zurich (Switzerland), has been named the first Ralph C. Brown Visiting Professor at Presbyterian-St. Luke's Hospital.

Dr. Forster has also served as consultant in internal medicine at Samaritan hospital and the Swiss Nursing School. His research activities have been in the area of clinical cardiology and heart function test.

A native of Zurich, Dr. Forster received his medical education at the Universities of Zurich and Lausanne. He is a member of the Swiss Societies for internal medicine, cardiology, angiography, clinical chemistry, physiology and pharmacology and sports medicine.

Dr. Ralph C. Brown was the father of Dr. R. Gordon Brown, associate attending physician at the hospital. He was a graduate of Rush Medical College and served as clinical professor of medi-

cine on its faculty. He was also senior attending physician on the staff of Presbyterian Hospital.

Dr. Brown was an authority in gastroenterology and peptic ulcer. He was editor of the section of gastroenterology in the yearbook of medicine and contributed to the Oxford Textbook of Medicine.

MILBERG, MAX B., '40 (Brooklyn, New York) writes that fortunately there are no changes in his curriculum vitae.

FRIED, JULIUS L., '40 (Lincolnwood, Illinois) practices internal medicine on Chicago's north side. His three children are all in college . . . two at the University of Chicago and one at the University of Michigan. "I am anxious to see the reopening of Rush."

MORGAN, SHERMAN M., '40 (San Diego, California) has been practicing internal medicine in San Diego for the past 14 years.

TUCH, BENJAMIN E., '40 (Los Angeles, California) reports that his son, Barry Alan, is a member of the freshman class at the University of Chicago School of Medicine.

BROWN, IRVING E., '41 (Exeter, New Hampshire) gave up his general practice in 1964 and is now on the anesthesiology staff at Exeter Hospital. His daughter is a senior at the University of New Hampshire, one son is a junior at Dartmouth, and his youngest son is a high school senior.

TALBOT, BLAKE S., '41 (San Diego, California) retired in 1962 as a captain in the U. S. Navy Medical Corps. He now has a private urology practice. His son is a junior in college and his daughter is in junior high.

WHITAKER, EUGENE G., '41 (Magna, Utah) is in private practice and opened a new office last November. He also is in industrial medicine

William Sicher '40

with the Kennicott Corporation. He and his wife have five children and two grandchildren.

WHITMORE, JOHN D., '41 (Denver, Colorado) is practicing obstetrics and gynecology in Denver. "Really enjoy getting the Rush Bulletin."

BERLIN, RICHARD B., '42 (Teaneck, New Jersey) is currently serving as president of the Bergen County Medical Society.

HANDY, GEORGE H., '42 (Wisconsin Rapids, Wisconsin) is director of the Bureau of Comprehensive Health Planning for Wisconsin and assistant state health officer for Wisconsin. Last June, he was made a Fellow of the American College of Preventive Medicine.

Herman F. Boerner '42 Photo by Noah Barysh '33

SUGRANES, JOSE G., JR., '42 (River Forest, Illinois) is director of the department of radiology of Bethany Methodist Hospital. He and his wife are presently on a world tour with the Pacific Medical Center group.

SCHLIES, EDWARD W., '42 (Pleasanton, California) has moved his pediatric practice from San Francisco to Alameda County. His daughter was married last year to a third year medical student in Tours, France. His eldest son, E. Allen, is a freshman at Loyola Medical School (Stritch). He graduated from Notre Dame in 1967.

USOW, EUGENE J., '42 (Whitefish, Wisconsin) reports that his son, Barry, was graduated from the University of Wisconsin Medical School in 1968.

College-Hospital Alumni Hold Reunion During ACP Meeting

The Alumni Association of Rush Medical College held a joint luncheon-reunion with the Presbyterian-St. Luke's Hospital Alumni Foundation on April 21 in Chicago.

Thirty-five Rush alumni attended the lunch at Presbyterian-St. Luke's along with 23 hospital alumni. The meeting was held during the American College of Physicians annual meeting.

Among the Rush men attending were: Carl O. Rinder '13, Will F. Lyon '17, Ethel M. Davis '19, John Brennan '20, Arthur Meyn '20, Eugene F. Traut '20, George H. Irwin '21, Frank B. Kelly, Sr. '21, Clarence Johnson '23, Harold I. Meyer '23, W. Phillip Corr '24, and Knowlton E. Barber '24.

Manuel E. Lichtenstein '25, John F. Pick '25, Arkell M. Vaughn '25,

I. Pat Bronstein '26, Leander Riba '26, J. Daniel Willems '27, Arthur E. Diggs '28, Pat A. Tuckwiller '29, Thomas Masters '30, Willard Woods '30, R. Kennedy Gilchrist '31, Jacob Schoolnic '31, Hilda H. Kroeger '32, Clarence Monroe '33.

James W. Merricks '34, George W. Warrick '34, William E. Elliott '35, Edward S. Murphy '36, Effie M. Ecklund (Lerner) '37, Edward C. Holmblad '37, Walter Mayne '37, Gustav Kaufmann '38, J. Will Fleming '38, Isaac Michael '42.

SPRING REUNION was attended by nearly 70 alumni of Rush Medical College and Presbyterian-St. Luke's Hospital. The luncheon was held at the hospital during the American College of Physicians meeting in Chicago. Thirty-five Rush alumni attended the lunch.
